A new perspective on United States software development, seen through the patent battles that shaped our technological landscape This first comprehensive history of software

patenting explores how patent law made software development the powerful industry that it is today. Historian Gerardo Con D í az reveals how patent law has transformed the ways computing firms make, own, and profit from software. He shows that securing patent protection for computer programs has been a central concern among computer developers since the 1950s and traces how patents and copyrights became inseparable from software development in the Internet age. Software patents, he argues, facilitated the emergence of software as a product and a technology, enabled firms to challenge each other ' s place in the computing industry, and expanded the range of creations for which American intellectual property law provides protection. Powerful market forces, aggressive litigation strategies, and new cultures of computing usage
