This volume brings together
the proceedings of the II
International Scientific and
Practical Conference
"Professional Artistic
Education and Culture:
Challenges of the XXI
Century", held at Borys
Grinchenko Kyiv University,

Ukraine, in April 2016. It discusses a wide range of the most pressing issues in contemporary artistic education and culture, including philosophical principles, the historical experience of professional artistic education, and problems concerning innovative technologies in continuing professional education, among others. In Ukraine's present socio-cultural space, the issue of finding new ways of designing the semantic content of artistic education is often controversial, and requires broad awareness from the larger international educational community. This is because artistic education plays an important role in the preservation and development of national cultural and educational traditions, and contributes to the integration process into the international educational space.

While Western observers should be prepared to see Russia's armed forces become more capable over the next decade, they should avoid exaggerating the threat posed by these developments. By 2027, the Russian armed forces are likely to be considerably better equipped than they are today. Nevertheless, one should not overstate the pace of

probable modernization. While some progress may be made in the development of new-generation equipment, the armed forces will probably still rely on a mix of legacy hardware and modernized Soviet systems alongside new designs. Providing Russia with 21st-century military capabilities and adapting its armed forces to today's challenges will require sustained investment in modernization efforts and military R&D.
