Many years ago in Germany, Pilenum Television was born when the author Markus Lenz was trying to make photos and videos of miniature cars in macro photography mode. Because toy cars did not move, Markus was looking for other objects to film. Finally, he found model trains. It is like a challenge to make videos in macro photography mode of model trains in action. In the course of time a preference has emerged to film model railway layouts and model railroad displays to create entertaining, high-quality video documentations. Today, Pilenum Television is one of the leading video networks for toy trains, model trains, model railroading and railway modelling. Pilenum Television presents high-quality documentaries about the wonderful miniature world of model trains. Our modern world offers an unbelievable number of leisure activities, such as video games, railway

simulations on the computer and much more.

Therefore, such a wonderful hobby as rail modeling should not be forgotten. Model railroading is educationally valuable, and railway modelling promotes the creativity of children. Finally, model trains are a great hobby for adults. Actually, Pilentum Television offers more than 350 videos on YouTube, Dailymotion and Amazon Prime Video, for free. In order to keep track of all video films, this e-book was created. It is a filmography containing descriptions and additional information about Pilentum Television's movies.
