Most amateur astronomers – and many of those with similar interests but who are not currently practising observers – have only a sketchy understanding of space flight. This book provides an introduction to its mechanics. The beauty of this book, written by an engineer who is also an accomplished science writer, is that it covers the subject comprehensively, and yet is almost entirely descriptive and non-mathematical. It deals with all aspects of space flight, from how to leave the Earth (including the design of the rocket, mission planning, navigation and communication), to life in space and the effects of weightlessness. The book also includes sections describing how an amateur can track satellites and understand their orbital parameters.

Barbie or Lego? Reading maps or reading emotions? Do you have a female brain or a male brain? Or is that the wrong question? On a daily basis we face deeply ingrained beliefs that our sex determines our skills and preferences, from toys and colours to career choice and salaries. But what does this mean for our thoughts, decisions and behaviour? Using the latest cutting-edge neuroscience, Gina Rippon unpacks the stereotypes that bombard us from our earliest moments and shows how these messages mould our ideas of ourselves and even shape our brains. Rigorous, timely and liberating, *The Gendered Brain* has huge repercussions for women and men, for parents and children, and for how we identify ourselves. 'Highly accessible... Revolutionary to a glorious degree' Observer

Maurine Stuart (1922 – 1990) was one of a select group of students on the leading edge of Buddhism in America: a woman who became a Zen master. In this book, she draws on down-to-earth Zen stories, her friendships with Japanese Zen teachers, and her experiences as a concert pianist to apply the inner meanings of Buddhism to practicing the basic ethics of daily living—nowness, unselfishness, compassion, and good will toward every living being. She emphasizes that inner growth

comes through our own efforts and intuition, especially as we cultivate them through meditation practice. We can then take what we have learned in meditation and use it to respond to our daily lives in a straightforward and creative way, guided not by concepts or dogma, but by direct insight into the reality of the present moment.

Art about glaciers, queer relationships, political anxiety, and the meaning of Blackness in open space—*Borealis* is a shapeshifting logbook of Aisha Sabatini Sloan 's experiences moving through the Alaskan outdoors. In *Borealis*, Aisha Sabatini Sloan observes shorelines, mountains, bald eagles, and Black fellow travelers while feeling menaced by the specter of nature writing. She considers the meaning of open spaces versus enclosed ones and maps out the web of queer relationships that connect her to this quaint Alaskan town. Triangulating the landscapes she moves through with glacial backdrops in the work of Black conceptual artists and writers, Sabatini Sloan complicates tropes of Alaska to suggest that the excitement, exploration, and possibility of myth-making can also be twinned by isolation, anxiety, and boredom. *Borealis* is the first book commissioned for the Spatial Species series, edited by Youmna Chlala and Ken Chen. The series investigates the ways we activate space through language. In the tradition of Georges Perec 's *An Attempt at Exhausting a Place in Paris*, Spatial Species titles are pocket-sized editions, each keenly focused on place. Instead of tourist spots and public squares, we encounter unmarked, noncanonical spaces: edges, alleyways, diasporic traces. Such intimate journeying requires experiments in language and genre, moving travelogue, fiction, or memoir into something closer to eating, drinking, and dreaming. *Lucy Longwhiskers Gets Lost* Scholastic Inc.

The tiny town of Chewandswallow was very much like any other tiny town except for its weather which came three times a day, at breakfast, lunch and dinner. But it never rained rain and it never snowed snow and it never blew just wind. It rained things like soup and juice. It snowed things like mashed potatoes. And sometimes the wind blew in storms of hamburgers. Life for the townspeople was delicious until the weather took a turn for the worse. The food got larger and larger and so did the portions. Something has to be done in Chewandswallow...and in a hurry.

The year is 2065. Rio de Janeiro, Brazil, is getting ready to celebrate its 500th anniversary. Ten million people will attend the event at the giant Copacabana Beach Park. Billions will watch on colossal screens spread throughout the Solar System. However, at midnight, something unprecedented and bombastic will, and is about to happen. Bruna is perhaps the last human female of her species who wants to be loved, wants to be a mother, and who wants to love and nurture her own children. Her civil cohabitant Maxim is too busy piloting spaceships to and from Planet Mars to offer her any attention. Bruna fears he's, at least in part, an android. An immersion into what things will be like living in Rio, living in Brazil, living on planet Earth, living on the Moon, and living on other planets in the Solar System. More significantly, this is an essay that seeks to address the overwhelming, startling, and unavoidable issue of whom and what we human beings will have become by 2065.

NATIONAL BESTSELLER • "A dazzling journey across the sciences and humanities in search of deep laws to unite them." —The Wall Street Journal One of our greatest scientists—and the winner of two Pulitzer Prizes for On Human Nature and The Ants—gives us a work of visionary importance that may be the crowning achievement of his career. In Consilience (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to

biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. “ This is an important book, exceptionally well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book. ” —Samuel M. Strong, *The American Journal of Sociology* “ This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those whose preferences stand against, a behavioristic approach to human activity. ” —Harry Prosch, *Ethics*
