Bob Eder has thoroughly
revised Study for the Series
65 Exam to reflect the new
additions to the syllabus for
the Series 65 test, effective
July 1, 2016. New topics
include alternative
investments, asset-back
securities, inverse and
leveraged funds, "soft
dollars," standard deviation
calculations, rules on
political contributions, and
much more. Study for the
Series 65 Exam is a study
guide for those persons who
plan to take the Series 65
exam, necessary to become
registered as investment
adviser representatives.
Passing the exam is
necessary for those who wish
to take compensation for
giving investment advice.
Study for the Series 65 Exam
includes both applicable
rules and practice questions
designed to test the reader's
comprehension. What makes
this book special is the
insertion of practice
questions throughout the
text. Each question
challenges the reader, and
asks him/her to make an
immediate decision on what
was just read. Every question
comes with an immediate
answer and clear explanation

of why the answer is correct
or incorrect. The presence of
the practice questions and
immediate feedback
embedded throughout Study
for the Series 65 Exam gives
the reader an important edge
in comprehension and
retention.

Covering all the
major concepts,
proofs, and
theorems, the Second
Edition of Ramsey
Theory is the
ultimate guide to
understanding every
aspect of Shelah's
proof, as well
as the original
proof of van der

Ramsey Theory,
Second Edition
includes new and
exciting coverage of
Graph Ramsey Theory
and Euclidean
Ramsey Theory
and also relates
Ramsey Theory to
other areas in
discrete
mathematics. In
addition, the book
features the

With today's world torn by violence and conflict, Richard B. Miller's study of the ethics of war could not be more timely. Miller brings

together the opposed traditions of pacifism and just-war theory and puts them into a much-needed dialogue on the ethics of war. Beginning with the duty of nonviolence as a point of convergence between the two rival traditions, Miller provides an opportunity for pacifists and just-war theorists to refine their views in a dialectical exchange over a set of ethical and social questions. From the interface of these two long-standing and seemingly incompatible traditions emerges a surprisingly fruitful discussion over a common set of values, problems, and interests: the presumption against harm, the relation of justice and order, the ethics of civil disobedience, the problem of self-righteousness in moral discourse about war, the ethics of nuclear deterrence, and the need for practical reasoning about the morality of war. Miller pays critical attention to thinkers such as Augustine and Thomas Aquinas, as well as to modern thinkers like H. Richard Niebuhr, Paul Ramsey, Martin Luther King, Jr., James Douglass, the Berrigans, William O'Brien, Michael Walzer, and James Childress. He demonstrates how pacifism and just-war tenets can be joined around both theoretical and practical

issues. Interpretations of Conflict is a work of massive scholarship and careful reasoning that should interest philosophers, theologians, and religious ethicists alike. It enhances our moral literacy about injury, suffering, and killing, and offers a compelling dialectical approach to ethics in a pluralistic society.

Richard B. Miller is assistant professor of religious studies at Indiana University.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy

with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

The Heart of a Woman offers the first-ever biography of Florence B.

Price, a composer whose career spanned both the Harlem and Chicago Renaissances, and the first African American woman to gain national recognition for her works. Price's twenty-five years in Chicago formed the core of a working life that saw her create three hundred works in diverse genres, including symphonies and orchestral suites, art songs, vocal and choral music, and arrangements of spirituals. Through interviews and a wealth of material from public and private archives, Rae Linda Brown illuminates Price's major works while exploring the considerable depth of her achievement. Brown also traces the life of the extremely private individual from her childhood in Little Rock through her time at the New England Conservatory, her extensive teaching, and her struggles with racism, poverty, and professional jealousies. In addition, Brown provides musicians and scholars with dozens of musical examples.

Vodou has often served as a scapegoat for Haiti's problems, from political upheavals to natural disasters. This tradition of scapegoating stretches back to the nation's founding and forms part of a contest over the legitimacy of the religion, both beyond and within Haiti's borders. The Spirits and the Law

examines that vexed history, asking why, from 1835 to 1987, Haiti banned many popular ritual practices. To find out, Kate Ramsey begins with the Haitian Revolution and its aftermath. Fearful of an independent black nation inspiring similar revolts, the United States, France, and the rest of Europe ostracized Haiti. Successive Haitian governments, seeking to counter the image of Haiti as primitive as well as contain popular organization and leadership, outlawed "spells" and, later, "superstitious practices." While not often strictly enforced, these laws were at times the basis for attacks on Vodou by the Haitian state, the Catholic Church, and occupying U.S. forces. Beyond such offensives, Ramsey argues that in prohibiting practices considered essential for maintaining relations with the spirits, anti-Vodou laws reinforced the political marginalization, social stigmatization, and economic exploitation of the Haitian majority. At the same time, she examines the ways communities

across Haiti evaded, subverted, redirected, and shaped enforcement of the laws. Analyzing the long genealogy of anti-Vodou rhetoric, Ramsey thoroughly dissects claims that the religion has impeded Haiti's development.
