Most people know that
there are 70 million Baby

Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts

from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now

Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to

meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Mechanical Aptitude Test Secrets

How2Become Ltd

- First ever reproduction of every major stained glass panel of The Great East Window of York Minster in color - New discoveries and biblical interpretation as a result of a £ 20M restoration project

After an immense process of careful restoration and conservation, the outstanding artistry of the Great East Window is revealed afresh through state-of-the art photography that captures the complete sequence of major panels, in corrected placements, for the very first time. At the size of a tennis court, it is the largest single expanse of medieval stained glass in Britain and one of the largest medieval windows ever made. This visual feast is brought to life by author Sarah Brown, who explores the

history, artistry, meaning and restoration of the window, revealing new insights on a fragile masterpiece that has been described as England's Sistine Chapel.

Ground breaking new research has shed exciting new light on the window's complex narratives, relating its story to the Minster's history and liturgy. The Great East Window of York Minster explores the window's biblical presentation of the beginning and end of time, the window's relationships with other media and the technical processes behind its creation. This stunning, illustrated hardback presents an engaging contextual analysis of the window's unequivocal position as an English masterpiece. "The Great East

Window of York Minster tells the story of Time: from the Creation, Genesis, at the top, to the end of time, when a new heaven and a new earth is brought into being by Jesus Christ according to the Revelation of St John, at the bottom. It is a truly timeless masterpiece, with a message as relevant today as it was 600 years ago when it was painted."
- John Sentamu, Archbishop of York

more.

The Mississippi River Passes
Open Road Media
Ontario PI Benny Cooperman is on the case of a suspicious suicide in this “convincingly complex” mystery “with an ironic sense of humor” (Kirkus Reviews, starred review). Myrna Yates shows up at Benny Cooperman’s office asking him to check up on her husband, the contractor Chester Yates, who she believes is having an affair. It seems like an open-and-shut case, until Cooperman finds out that the straying spouse has committed suicide. Something

doesn't add up; Mr. Yates bought a 10-speed bicycle just 2 hours before he killed himself. Could this "suicide" in fact be murder? The Jewish detective's got a whole new case on his hands, one in which the suspicions of a wife turn out to be much darker than anyone could have imagined.

Cooperman's a detective with flair. Kinder and gentler than your average PI—and ironically squeamish about violence—he's the creation of author Howard Engel, a master of the crime genre whose enthusiastic fans have included Ruth Rendell, Donald E. Westlake, Julian

Symons, and Tony Hillerman. Engel's readership spans 13 countries, including Japan, England, Germany, Italy, Spain, Denmark, the United States, and his native Canada. *The Suicide Murders* is the first book in the Benny Cooperman Mysteries, but you may enjoy reading the series in any order.

The Suicide Murders Third Millennium Information Ancient Maya Commerce presents nearly two decades of multidisciplinary research at Chunchucmil, Yucatan, Mexico—a thriving Classic period Maya center organized around commercial exchange rather than agriculture. An urban center

without a king and unable to sustain agrarian independence, Chunchucmil is a rare example of a Maya city in which economics, not political rituals, served as the engine of growth. Trade was the *raison d'être* of the city itself. Using a variety of evidence—archaeological, botanical, geomorphological, and soil-based—contributors show how the city was a major center for both short- and long-distance trade, integrating the Guatemalan highlands, the Gulf of Mexico, and the interior of the northern Maya lowlands. By placing Chunchucmil into the broader context of emerging research at other Maya cities, the book reorients the understanding of

ancient Maya economies. The book is accompanied by a highly detailed digital map that reveals the dense population of the city and the hundreds of streets its inhabitants constructed to make the city navigable, shifting the knowledge of urbanism among the ancient Maya. *Ancient Maya Commerce* is a pioneering, thoroughly documented case study of a premodern market center and makes a strong case for the importance of early market economies in the Maya region. It will be a valuable addition to the literature for Mayanists, Mesoamericanists, economic anthropologists, and environmental archaeologists. Contributors: Anthony P.
