Rover Cars 1945 to 2005 Veloce Publishing Ltd

A unique look at the development of the Land Rover, this is the story of the simple four-wheel drive vehicle born out of post-war austerity that became a global byword for toughness and rugged style. Launched in 1948, the Land Rover owed its low-key existence to shoestring British ingenuity and—literally—odds and ends left over from World War II. Rover thought it could keep its factory ticking over as the company's post-war fortunes slowly revived. They also thought that farmers might appreciate it as a handy cross between a pick-up and a tractor. But it was soon obvious that the company had created, in the Land Rover, a world-beating product. Giles Chapman tells the story of how Land Rovers have tamed the planet's toughest terrain with their unstoppable off-road capability. It also charts how the Land Rover legend allowed the marque to gradually expand its range with the Range Rover, Discovery, Freelander, and the latest Range Rover Evoque. They're all cars as familiar in cities and suburbs as they are at home in the countryside. Land Rover has been controversial, its fortunes tied to Britain's economic ups and downs. Today it's on a roll, leading a renaissance in British design and manufacturing, yet the continued presence of the Defender helps keep the Land Rover Story absolutely genuine.

The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This is truly a unique story from the time of post War World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

Camel Trophy: the Definitive History Veloce Publishing

This book expands on and complements the burgeoning Brexit literature by placing the UK's vote to leave the EU in its longer historical and discursive contexts. It examines the embedded Euroscepticism, which has dominated British political discourse on the European project and the role of the UK within it for at least the last three decades. Brexit was the consequence of a consistent denigration of the European integration project in the public sphere in which the terrain, and the conceptual vocabulary, of debate were set by a dominant, right-wing Eurosceptic discourse. This framed the EU as inherently heterogeneous and antagonistic to the UK. The book examines how ideas of British exceptionalism, which underpin Eurosceptic discourses, are sustained and reproduced and offers an account of their enduring, affective power amongst the British population. It is in this context that it was possible for pro-Brexit campaigners to assemble and enthuse a new coalition of voters sufficient to deliver a 'leave' majority on 23 June 2016. This text will be of key interest to scholars and students of British, EU and European politics, the media and press, public opinion, political behaviour and nationalism studies.
