INTRODUCTION TO RAT ANATOMY

White albino rats, *Rattus norvegicus* are representatives of a major lineage of animals, the deuterostomes. This group includes such diverse organisms as starfish, sea urchins, and all vertebrates. Deuterostomes are classified together because all share a similar developmental pattern. Cleavage is radial, the anus forms

Human Anatomy & Physiology Laboratory Manual

Rat is a common rodent of the order Rodentia. It belongs to the class Mammalia of the subphylum Vertebrata and is often studied as a representative organism for mammals. As the structural organization of rats and humans are similar, it is widely used in medical research to evaluate the

effects of medications, before releasing them for human use.
