Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual

and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the

knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Everyone dreams of tropical escape.

But what happens when you escape for too long? Imagine spending 24 hours a day with your spouse in 31 not-so-square feet . . . for years; crossing the Pacific Ocean

on two gallons of fuel; and tossing spaghetti marinara around your living room, then cleaning it up while bouncing like ice in a martini shaker. Tightwads on the Loose tells the story of Wendy and Garth, lured to sea by the promise of adventure. They buy a 31-foot boat that fits their budget better than it fits Garth's

large frame and set sail for an open-ended voyage, never imagining they'd be gone seven years, or cover 34,000 miles at the pace of a fast walk. They live without most "necessities" and learn that teamwork and a sense of humor matter most as they face endless "character-building opportunities." They make a long-

anticipated visit to '60s sitcom: jobs at wondering what had the island where a U.S. Army base in changed more, then Garth had been the Marshall or the world. shipwrecked as a Islands. With a little planning and

foresight, refrigeration is absolutely not necessary. In this book, the author discusses how to store food and make delicious meals without the use of a refrigerator. From milk and cheese to eggs and meat, the book lays out ways any boater, hiker, or camper can have home-cooked meals without artificially freezing or cooling their food. Broken down into handy categories, this reference guide gives techniques on how to properly wash, store, treat, and cook your food for maximum flavor and usability. Written by a dedicated sailor whose own skills were honed on

months-long journeys, the tips in this guide can be put to use by anyone trying to avoid heavy, power-sucking refrigerators. Sailors, campers, and hikers all could benefit, and the books serves equally well for those in RVs, those with limited space, and those trying to live off the grid.

“ Unusual and illuminating . . . will appeal to all who are moved by and curious about Frank ’ s story and legacy, and everyone interested in humanitarian activism ” (Booklist). Although many books and literary analyses have been written about Anne Frank ’ s life and diary, none

have explored the surprising influence she has had on young people in countries all over the world, helping to shape their moral framework and giving them critical life skills. This is due in part to the merits of a traveling exhibition created by the Anne Frank House in Amsterdam in 1985, which has so far been seen by over nine million people. The Anne Frank exhibition, along with its innovative educational and cultural activities, has circumnavigated the globe many times. In this fascinating study, Gillian Walnes Perry explores the various legacies of Anne Frank ’ s influence. She looks at the complex life of Anne Frank ’ s father and the motivations that

powered his educational philosophy. She shares new insights into the real Anne Frank, personally gifted by those who actually knew her. Global icons such as Nelson Mandela and Audrey Hepburn relate the influence that Anne Frank had on shaping their own lives. This book presents—all in one place and for the very first time—the inspirational stories of a diverse variety of people from all over the world, brought together by the words of one particularly articulate and inspiring teenage victim of the Holocaust.

"Few twentieth-century Americans lived a more creative, event-filled, and often conflicted life than the Boston-born aviation pioneer and yacht designer W. Starling Burgess.

Orphaned at twelve, Burgess received his first patent at nineteen, left Harvard, and, following the suicide of the first of his five wives, published a book of poetry at twenty-four. Among his children was the celebrated author-artist Tasha Tudor. After launching his career as

a yacht designer, Burgess built the first airplane to fly the skies of New England (in 1910) and was selected as the sole manufacturer of aircraft under the Wright Brothers' patents. He received the prestigious Collier Trophy 'for the greatest progress in aviation.' His company was a primary supplier of both civilian and military aircraft before the main factory in Marblehead burned to the ground in 1918. After World War I, Burgess returned to his first love, yacht design, drafting the lines for three

successive Gloucester fishing schooners to compete against Canadian entries for the International Fishermen's Trophy--and in 1924 introduced the staysail rig on the all-but-unbeatable schooner yacht Advance. He later designed the three acclaimed America's Cup winners: the J-Class sloop Enterprise (1930), Rainbow (1934), and Ranger (1937). In 1933, he collaborated with R. Buckminster Fuller to design and create the revolutionary Dymaxion automobile. Although an occasional

morphine user (Burgess was successfully treated for chronic ulcers on the eve of World War II), he enjoyed some of his most productive years as a naval architect and inventor doing top secret anti-submarine work for the Navy and Air Force"--Provided by publisher.
