The modern cruising

catamaran has arrived
The arguments are
over and the verdict is
in--cruising
catamarans comprise
a rapidly growing
percentage of the
cruising fleet
worldwide. Their
advantages of space,
stability, speed, and
handling under power
are truly compelling,

and modern cats are every bit as reliable as monohulls. This long overdue, in-depth guide will help you choose and cruise the right catamaran for your needs. " An authoritative guide for novices and experienced sailors; the best book written on the subjects since the early 1990s. " -- " Trimaran " Jim Brown, renowned multihull designer " In Catamarans, Gregor Tarjan shares his enthusiasm for yachts with two hulls, based on years of sailing all types. An excellent introduction. " --Dick Newick, legendary catamaran and trimaran designer " If you are contemplating spending hundreds of thousands of dollars on a cruising catamaran, the small

price of this book is probably the best investment you could possibly start with. " --from the Foreword by Charles K. Chiodi, publisher of *Multihulls Magazine* *Boating* Taylor & Francis Reeds *Superyacht Manual*, published in association with Bluewater Training, is a complete reference and training manual for everyone involved with large yachts, from deck-hands to captains, as well as for leisure boaters and sailors. Covering the

course syllabus for all career levels to Officer of the Watch, with explanatory diagrams and photographs, this user-friendly book includes: the key information for all courses required from basic training through Yachtmaster ? to Officer of the Watch (Yacht) comprehensive coverage of: safety, sea survival, first aid, fire fighting, navigation and radar, seamanship, meteorology, marine radio, general ship knowledge

additional information on the career path and marine law, including international and flag state requirements full text of the Collision Regulations; single letter flag and Morse codes. This is the complete on-board reference, whether you are starting out in yachting and looking for the essentials of safety and navigation, or you are seeking a clear understanding of the operation and manning of large yachts and the legislation

concerning them. Boating Bloomsbury Publishing In Voyages, Paul Jacobs takes us through his discovery of a passion for sailing, the joys of meeting and falling in love with Nancy Kaul, and the couples' experience together cruising on 36' sailboats in exotic locations all around the world with the Sunsail owners program. Paul describes the cruises with a scientist's precision, a sense of humor, and a humble perspective that will engage sailors and non-sailors alike. Nancy contributes a second perspective with detailed journal entries interspersed throughout the book. Together, the couple provides a story that's a successful

fusion of a manual for travel to and bareboat sailing at numerous geographic locations, and a personal memoir, all in an interesting, informative, and inspiring work. A History of the Women Marines, 1946-1977 A&C Black This new edition explains the GMDSS rules, regulations and procedures. The book contains the regulations drawn from the International Telecommunication Union (ITU) and it is a useful teaching aid for GMDSS topics thoroughly updated to explain: significant changes in operating procedures to

GMDSS, improvements to communication equipment and the new opportunities they provide, including: Automatic Identification Systems (AIS), Inmarsat Fleet services amendments to GMDSS radio maintenance certificate. Also expanded to include sections on use of radio for: piracy and armed robbery attacks at sea, medical advice and assistance, Mede Vac; and contains updated and extended contact details of important organisations relevant to GMDSS.

VHF Marine

Channel Usage Guide McGraw Hill Professional RYA Tactics is the go-to handbook for all sailors and coaches interested in improving their performance on the race course. Written by sailing tactics specialist Mark Rushall, it is based on his many years of successful dinghy and keelboat racing, and his career as an Olympic sailing coach. Packed with easy-to-digest advice and information, it has clear diagrams and explanations and features excellent

photography throughout to demonstrate racing in action. RYA Tactics breaks down the myths around racing tactics and provides you with winning strategies for a wide range of race courses and weather conditions. Written from the perspective of both coach and sailor, RYA Tactics takes you logically and holistically through each aspect of a sailing race. Shedding a new light on mastering race tactics, it has three easy-to-follow sections: Setting

the scene Before the start The race The third edition features new chapters that include cutting-edge advice on analysing weather conditions, club racing, positioning as a strategy, and tactics in fast boats. It also discusses strategy building and looks at all parts of the race in detail, recommending specific tactics for each stage. Whether you're looking to understand wind shifts better, start fast, use a race compass, or get round the marks first, this book will

get you there. **Day Skipper for Sail and Power** Bloomsbury Publishing Restoring a fibreglass yacht is not something for the faint-hearted, even if you don't intend to do all the work yourself (you still need to understand the processes to be gone through). But the satisfaction of the job well done, not to mention the possible cost savings on buying a new yacht, are immense. Nevertheless, it is not something that should be undertaken lightly

and without careful consideration. That is where this book comes in, as Enric Roselló takes you through his restoration of a 30-year-old 40-foot yacht. Broken down into 46 chapters, Enric details the stages of his restoration in chronological order. For each he starts with an overview of the task and the thinking behind the approach he took. Just these introductory pieces alone are ideal for someone contemplating a restoration (of all or part of a boat) to read before

making the final decision as to whether to go ahead. For those who decide to take on the challenge, each overview is followed by an in-depth step-by-step account of what they did, accompanied by numerous informative photo sequences (with over 800 colour photos in total). The material in this book would be invaluable both to boat owners who are considering a complete overhaul and to those who have one or two smaller jobs to do. All possible subjects are

covered, including dealing with osmosis, the interiors, deck, rigging, electrics and electronics, plumbing, engine, galley, heads and much more. The author is very honest about the amount of work and commitment required and also offers advice about when to call in the professionals and when to consider doing the work yourself. Anyone contemplating a complete or partial restoration is advised to read this book beforehand, so you know what is ahead, and to follow its guidance

if you to decide to proceed.

GPS For Mariners is a comprehensive guide for recreational boaters to learn how to operate and effectively use today's GPS systems in everyday navigational situations. While all GPS products come with operational manuals and there are books on how to use your GPS for land or aerial navigation, there is very little information available to recreational boaters on how to best utilize their GPS

for marine navigation. From learning the history of GPS, discovering the functions of the GPS, understanding basic and advance course-plotting, learning advance navigation with GPS, interfacing a GPS with an autopilot, to using a GPS with electronic charts on a PC, *GPS For Mariners* includes everything the novice to the more experienced boater should know about their GPS system. *GPS For Mariners* is the ultimate how-to guide and ready reference leading to GPS proficiency. [GPS for Mariners](#) Voyage Press

This book reports on research and developments in human-technology interaction. A

special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security,

and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHIET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new

generation of service systems.

For over 50 years Heavy Weather Sailing has been regarded as the ultimate international authority on surviving storms at sea aboard sailing and motor vessels. In this book, former Commodore of the Ocean Cruising Club Martin Thomas brings together a wealth of expert advice from many of the great sailors of the present, including fresh accounts of yachts overtaken by extreme weather,

from Ewan Southby-Tailyour, Alex Whitworth and Dag Pike to Larry and Lin Pardey, Matt Sheahan and Andrew Cloughton. The expert advice section has been updated in line with current thinking, with major new additions tackling preventing or coping with lightning strikes, navigating in heavy weather with both paper and electronic charts, the choice and use of tenders in severe weather, and special problems faced by the new generation of foiled cruising boats. For the first time the book also covers the unique challenges presented by weather in high

latitudes, with more yachts crossing the Drake Passage and attempting the North West Passage. These revisions ensure that Heavy Weather Sailing is as relevant, useful and instructive for today's sailor venturing offshore as it ever was. This is the definitive book for crews of any size contemplating voyages out of sight of land anywhere in the world, whether racing or cruising. It gives a clear message regarding the preparations required, and the tactics to consider when it comes on to blow.

An updated reference

for power and sail boaters surveys the latest developments in safety systems, marine electronics, radar, and communications, and federal laws and regulations, and includes information on tides, currents, weather, and navigation.

Reeds Crew Handbook A&C Black

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling.

Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all

aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Troubleshooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw. Cruising World A&C Black Day Skipper for

Sail and Power is a major reference book for anyone following the RYA Day Skipper course. Right up to date with new developments and covering all the theory and practical aspects of the RYA Day Skipper Certificate with full colour photography and helpful diagrams, it is also a clear and simple introduction to pilotage, navigation and general boatwork for anyone intending to make coastal passages in a small boat. With its refreshingly practical approach

and by the same author as the highly successful Yachtmaster for Sail and Power, no one intending to follow an RYA Day Skipper course whether for sail or power can afford to be without this lively, helpful guide to complement the course and assist with exam preparation. An accompanying Day Skipper Exercises for Sail and Power is available.

Lakeland Boating Springer Science & Business Media The Reeds Skipper's Handbook, now in

its 6th edition, has been a bestseller since first publication 20 years ago. Now for the first time, here is the Reeds Crew Handbook for skippers to hand to new and aspiring crew. It will give them all the essential knowledge they need to undertake the tasks traditionally handled by crew aboard any size of yacht, including: - Steering (both with a tiller and a wheel) - Raising, dropping and reefing a sail - Boat handling (using tide, wind, etc) - Handling

lines (throwing, coiling, lassoing, etc) - Tying up a boat on a pontoon and against a quay wall - Attaching bow and stern lines and springs - Handling an anchor - Using the radio - Basic first aid - Essential knots Presented in bite-sized topics in a very accessible and undaunting fashion, and packed with colour illustrations to guide crew through each task, the Reeds Crew Handbook will be a useful primer for new crew before going to sea, and a handy pocket-sized aide-memoire for

experienced crew when under sail. *Yachting Royal Yachting Association* Despite the acknowledged contribution made by the 20,000 women Reservists who served in the Marine Corps during World War II, there was no thought in 1946 of maintaining women on active duty or, for that matter, even in the Reserve forces. This volume recounts the events that brought about the change in thinking on the part of Marines, both men and women, that led to the integration of women into the Corps, to the point where they now constitute eight percent of our strength. A History of the Women Marines,

1946-1977 is almost entirely derived from raw files, interviews and conversations, newspaper articles, muster rolls and unit diaries, and materials loaned by Marines. There was no one large body of records available. In the course of the project, more than 300 letters were written to individuals, several mass mailings were made, and notices soliciting information were printed in all post and station newspapers, *Leatherneck*, *Marine Corps Gazette*, *Retired Marine*, and the newsletters of Marine Corps associations. More than 100 written responses were received and some women Marines generously loaned us personal papers and

precious scrapbooks. Especially helpful in piecing together the events between World War II and the passage of the Women's Armed Services Integration Act were the scrapbooks of former Director of Women Marines Colonel Julia E. Hamblet, and former WR Dorothy M. Munroe. Taped interviews were conducted with 32 women, including former Director of the Women's Reserve Colonel Ruth Cheney Streeter. Researching this history was a challenge. Women's units were extremely difficult to find. Only those labeled "Women Marine Company" were easily identified. At times, days were spent screening the muster rolls of all the

companies of all the battalions on a base looking for one with personnel having feminine first names. More recent unit diaries were even less useful since they are not signed by commanding officers and initials are used rather than first names. To add to the problem, the Corps had no system that permits a researcher to find a married woman when only her maiden name is known, or vice versa.

Principles of Yacht Design Springer Nature

Principles of Yacht Design has established itself as the standard book on the subject for practising designers, naval architecture students, discerning

boat owners as well as the boatbuilding industry as a whole. The fifth edition is completely revised and expanded. It examines every aspect of the process of yacht and powerboat design. The new edition includes new findings from recent research in aero and hydrodynamics, as well as covering the most recent changes to building standards. The authors have used a newly built 41-foot performance cruiser to demonstrate the practical application of yacht design theory. This new edition includes photos of the building process and detailed

explanations.
