VHF Marine Channel Usage Guide Lulu Press, Inc  
GPS For Mariners is a comprehensive guide for recreational boaters to learn how to operate and effectively use today's GPS systems in everyday navigational situations. While all GPS products come with operational manuals and there are books on how to use your GPS for land or aerial navigation, there is very little information available to recreational boaters on how to best utilize their GPS for marine navigation. From learning the history of GPS, discovering the functions of the GPS, understanding basic and advance course-plotting, learning advance navigation with GPS, interfacing a GPS with an autopilot, to using a GPS with electronic charts on a PC, GPS For Mariners includes everything the novice to the more experienced boater should know about their GPS system. GPS For Mariners is the ultimate how-to guide and ready reference leading to GPS proficiency.

A Difficult Disguise (Alphabet Regency Romance) Imray, Laurie,

Norie and Wilson Ltd  
Photographer Jay Fleming turned his attention to Smith and Tangier Islands - the Chesapeake Bay's last inhabited 'water-locked' islands. Fleming has made countless trips to the islands to document the unique way of life and environment that have been shaped by isolation and the waters of the Chesapeake. This collection of photographs will fill the pages of Fleming's second book, Island Life. This body work comes at an important time for the islands, as their populations continue to decline and the unrelenting forces of the bay threaten the working working waterfronts that have sustained the communities for centuries. Fleming hopes that his

---

photography will immerse readers in the Island Life and capture a crucial moment in time for the Chesapeake's most unique communities.

### **RYA Tactics (E-G40)**

Bloomsbury Publishing

RYA Tactics is the go-to handbook for all sailors and coaches interested in improving their performance on the race course. Written by sailing tactics specialist Mark Rushall, it is based on his many years of successful dinghy and keelboat racing, and his career as an Olympic sailing coach. Packed with easy-to-digest advice and

information, it has clear diagrams and explanations and features excellent photography throughout to demonstrate racing in action. RYA Tactics breaks down the myths around racing tactics and provides you with winning strategies for a wide range of race courses and weather conditions. Written from the perspective of both coach and sailor, RYA Tactics takes you logically and holistically through each aspect of a sailing race. Shedding a new light on mastering race tactics, it has three easy-to-

---

follow sections: Setting the scene Before the start The race The third edition features new chapters that include cutting-edge advice on analysing weather conditions, club racing, positioning as a strategy, and tactics in fast boats. It also discusses strategy building and looks at all parts of the race in detail, recommending specific tactics for each stage. Whether you're looking to understand wind shifts better, start fast, use a race compass, or get round the marks first, this book will

get you there.

### Catamarans A&C Black

Restoring a fibreglass yacht is not something for the faint-hearted, even if you don ' t intend to do all the work yourself (you still need to understand the processes to be gone through). But the satisfaction of the job well done, not to mention the possible cost savings on buying a new yacht, are immense. Nevertheless, it is not something that should be undertaken lightly and without careful consideration. That is where this book comes in, as Enric Rosell ó takes you through his restoration of a 30-year-old 40-foot yacht. Broken down into 46 chapters, Enric details the stages of his restoration in chronological order. For each he starts with an overview of the task and the thinking behind the approach he took. Just these introductory pieces alone are ideal for

---

someone contemplating a restoration (of all or part of a boat) to read before making the final decision as to whether to go ahead. For those who decide to take on the challenge, each overview is followed by an in-depth step-by-step account of what they did, accompanied by numerous informative photo sequences (with over 800 colour photos in total). The material in this book would be invaluable both to boat owners who are considering a complete overhaul and to those who have one or two smaller jobs to do. All possible subjects are covered, including dealing with osmosis, the interiors, deck, rigging, electrics and electronics, plumbing, engine, galley, heads and much more. The author is very honest about the amount of work and commitment required and also offers advice about when to call in the professionals and when to consider doing the

work yourself. Anyone contemplating a complete or partial restoration is advised to read this book beforehand, so you know what is ahead, and to follow its guidance if you to decide to proceed.

Yachting International Marine/Ragged Mountain Press

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the

---

book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

**Ocean Passages and Landfalls** Springer Nature

From the beginning Integrated Photonics introduces numerical techniques for studying non-analytic structures. Most

chapters have numerical problems designed for solution using a computational program such as Matlab or Mathematica. An entire chapter is devoted to one of the numeric simulation techniques being used in optoelectronic design (the Beam Propagation Method), and provides opportunity for students to explore some novel optical structures without too much effort. Small pieces of code are supplied where appropriate to get the reader started on the numeric work. Integrated Photonics is designed for the senior/first year graduate student, and requires a basic familiarity with electromagnetic waves, and the ability to solve differential equations with boundary conditions.

## **Boats** Bloomsbury Publishing

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series.

Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

**Heavy Weather Sailing 8th edition** Kasey Michaels

'This cruising guide for ocean voyagers provides

invaluable passage-planning information for tried and tested routes around the world. Climates and weather patterns, currents, seasons and timings are key to selecting routes, but just as important is knowing something about the countries that you will arrive in. Details of the expected formalities and regulations are followed by essential information on key landfalls, accompanied by the first-hand observations of well-known world sailors and authors Rod Heikell and Andy O'Grady. Text and plans have been updated for this third edition which is illustrated with a number of new photographs to inspire both dreamers and passagemakers. "I have recently been planning a voyage from Trinidad to New Zealand using Ocean Passages and Landfalls by Rod Heikell and Andy O'Grady. The book has been an exceptional resource. The mass of information on a wealth of subjects is excellent. The layout is beautifully put together and very accessible. The pilotage and chartlets will be invaluable. The book will certainly

---

be travelling with me and I cannot recommend it highly enough to anybody who is planning ocean voyaging.” Theresa Kewell, S/Y Mr Blue ‘This is a ‘blue planet’ book. Its scope is awe-inspiring as it takes an overview of the globe as the yachtsman’s potential cruising ground... It is of course possible to glean all the macro information from scientific geophysical sources, but the personality and experience of the authors adds an indispensable ingredient.’ Yachting Monthly

**Lakeland Boating** Springer Science & Business Media

The modern cruising catamaran has arrived The arguments are over and the verdict is in--cruising catamarans comprise a rapidly growing percentage of the cruising fleet worldwide. Their advantages of space, stability, speed, and handling under power are truly compelling, and modern cats are every bit as reliable as monohulls. This long overdue, in-

depth guide will help you choose and cruise the right catamaran for your needs. “An authoritative guide for novices and experienced sailors; the best book written on the subjects since the early 1990s.”--“Trimaran” Jim Brown, renowned multihull designer “In Catamarans, Gregor Tarjan shares his enthusiasm for yachts with two hulls, based on years of sailing all types. An excellent introduction.”--Dick Newick, legendary catamaran and trimaran designer “If you are contemplating spending hundreds of thousands of dollars on a cruising catamaran, the small price of this book is probably the best investment you could possibly start with.”--from the Foreword by Charles K. Chiodi, publisher of Multihulls Magazine

The Reeds Skipper's Handbook, now in its 6th edition, has been a bestseller since first publication 20 years ago. Now for the first time, here is the Reeds Crew Handbook for skippers to hand to new and aspiring crew. It will give them all the essential knowledge they need to undertake the tasks traditionally handled by crew aboard any size of yacht, including: - Steering (both with a tiller and a wheel) - Raising, dropping and reefing a sail - Boat handling (using tide, wind, etc) - Handling lines (throwing, coiling, lassoing, etc) - Tying up a boat on a pontoon and against a quay wall - Attaching bow and stern lines and springs - Handling an anchor - Using the radio - Basic first aid - Essential knots Presented in bite-sized topics in a very accessible and undaunting fashion, and packed with colour illustrations to guide crew through each task, the Reeds Crew Handbook will be a useful primer for new crew before going to sea, and a handy pocket-sized aide-memoire for experienced crew when under sail.

*GPS for Mariners* Sterling Publishing Company, Inc.

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

Cruising WorldVoyages: Stories of Ten  
Sunsail Owner Cruises

In *Voyages*, Paul Jacobs takes us through his discovery of a passion for sailing, the joys of meeting and falling in love with Nancy Kaull, and the couples' experience together cruising on 36' sailboats in exotic

---

locations all around the world with the Sunsail owners program. Paul describes the cruises with a scientist's precision, a sense of humor, and a humble perspective that will engage sailors and non-sailors alike. Nancy contributes a second perspective with detailed journal entries interspersed throughout the book. Together, the couple provides a story that's a successful fusion of a manual for travel to and bareboat sailing at numerous geographic locations, and a personal memoir, all in an interesting, informative, and inspiring work.

Principles of Yacht Design has established itself as the standard book on the subject for practising designers, naval architecture

students, discerning boat owners as well as the boatbuilding industry as a whole. The fifth edition is completely revised and expanded. It examines every aspect of the process of yacht and powerboat design. The new edition includes new findings from recent research in aero and hydrodynamics, as well as covering the most recent changes to building standards. The authors have used a newly built 41-foot performance cruiser to demonstrate the practical application of yacht design theory. This new edition includes photos of the building process and detailed explanations.

McGraw Hill Professional

An updated reference for power and sail boaters surveys the latest developments in safety systems, marine electronics, radar, and communications, and federal laws and regulations, and includes information on tides, currents, weather, and navigation.

Boating Fernhurst Books Limited

*Reeds Superyacht Manual*, published in association with Bluewater Training, is a complete reference and training manual for everyone involved with large yachts, from deckhands to captains, as well as for leisure boaters and sailors. Covering the course syllabus for all career levels to Officer of the Watch, with explanatory diagrams and photographs, this user-friendly book includes: the key information for all courses required from basic training through Yachtmaster ? to Officer of the Watch (Yacht) comprehensive coverage of:

---

safety, sea survival, first aid, fire fighting, navigation and radar, seamanship, meteorology, marine radio, general ship knowledge additional information on the career path and marine law, including international and flag state requirements full text of the Collision Regulations; single letter flag and Morse codes. This is the complete on-board reference, whether you are starting out in yachting and looking for the essentials of safety and navigation, or you are seeking a clear understanding of the operation and manning of large yachts and the legislation concerning them.

#### *MotorBoating* A&C Black

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate

horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

#### **Boating** McGraw Hill Professional

Despite the acknowledged contribution made by the 20,000 women Reservists who served in the Marine Corps during World War II, there was no

---

thought in 1946 of maintaining women on active duty or, for that matter, even in the Reserve forces. This volume recounts the events that brought about the change in thinking on the part of Marines, both men and women, that led to the integration of women into the Corps, to the point where they now constitute eight percent of our strength. A History of the Women Marines, 1946-1977 is almost entirely derived from raw files, interviews and conversations, newspaper articles, muster rolls and unit diaries, and materials loaned by Marines. There was no one large body of records available. In the course of the project, more than 300 letters were written to individuals, several mass mailings were made, and notices soliciting information were printed in all post and station newspapers, Leatherneck, Marine Corps Gazette, Retired Marine, and the newsletters of Marine Corps associations. More than 100 written responses were received and some women Marines generously loaned us personal papers and precious scrapbooks.

Especially helpful in piecing together the events between World War II and the passage of the Women's Armed Services Integration Act were the scrapbooks of former Director of Women Marines Colonel Julia E. Hamblet, and former WR Dorothy M. Munroe. Taped interviews were conducted with 32 women, including former Director of the Women's Reserve Colonel Ruth Cheney Streeter. Researching this history was a challenge. Women's units were extremely difficult to find. Only those labeled "Women Marine Company" were easily identified. At times, days were spent screening the muster rolls of all the companies of all the battalions on a base looking for one with personnel having feminine first names. More recent unit diaries were even less useful since they are not signed by commanding officers and initials are used rather than first names. To add to the problem, the Corps had no system that permits a researcher to find a married woman when only her maiden name is known, or vice versa.

*Chapman Piloting & Seamanship* Royal Yachting Association

Day Skipper for Sail and Power is a major reference book for anyone following the RYA Day Skipper course. Right up to date with new developments and covering all the theory and practical aspects of the RYA Day Skipper Certificate with full colour photography and helpful diagrams, it is also a clear and simple introduction to pilotage, navigation and general boatwork for anyone intending to make coastal passages in a small boat. With its refreshingly practical approach and by the same author as the highly successful Yachtmaster for Sail and Power, no one intending to follow an RYA Day Skipper course whether for sail or power can afford to be without this lively, helpful guide to complement the course and assist with exam preparation. An accompanying Day Skipper Exercises for Sail and Power is available.
