Sailing and hi-tech may seem to be far apart, and yet technology is now making navigation safer and more fun. Sailors can now have on 1 screen a 3-dimensional view of below, above and all around the boat with a combination of chartplotter, fish finder, weather satellite images, audible collision alarm. So, here is a version of another book Sailing Terms, we first published in 2015. This book is about 'Tech' terms we believe all sailors should know. Simple explanations of complex and often arcane words like transponder, mapcharter, and acronyms such as AIS, ECS, EPIRB, VHS, and so on. In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

Operating Summary McGraw Hill Professional

Jim and Nancy had a different dream for their retirement. They imagined themselves traveling to remote settlements on tropical Islands in their sailboat - meeting the people, learning the history, enjoying the environment, and giving a little back along the way. Their biggest challenge was how to accomplish that without the means of the "rich and famous."

They were a late-in-life couple; starting over in their forties. They didn't have trust funds and stock portfolios - just government jobs with modest pensions, 401K's and social security. They didn't even have a boat yet. What they did have was a plan. Sail with Jim and Nancy on their 41 foot sailboat, Solitaire, during their first year as cruisers. Read Jim's journals and Nancy's logs as they travel from New England to the Bahamas; learning one lesson after another and getting ready to venture into more remote areas of the world.

Ocean Passages and Landfalls is a handbook for world cruisers. It provides invaluable passage-planning information for crossing the oceans, with discussions on climates, seasons, oceanography and the merits of different world cruising routes. The heart of the book is an ocean-by-ocean round-up, and at the beginning of each of these sections is a description of routes, followed by information on the countries relevant to these routes. Details of formalities and regulations are then followed by essential information on key harbours and landfalls. This second edition (2009) has been thoroughly revised and enlarged and now features new sections on chosen areas and topics - the Atlantic Circuit or Cruising on Ice, for instance. Here the opportunity has been taken to provide more informal commentary and observations based on first-hand experience. These sections are illustrated by the author's colour photographs, many of which have been taken during the production of this new edition and sent in from far-flung parts of the oceans- Rod Heikell in the South Pacific and the Torres Strait, and Andy O'Grady in Brazil and the high latitudes of Chile. As an up-to-date reference for world cruising this new edition of 'Ocean Passages and Landfalls' sets the benchmark as both a practical reference and also as a book for dreamers.
