The manual opens with RCA's summary of tube fundamentals, covering the first 29 pages, with clear illustrations of tube actions. A spread of photos of tube manufacture follows, with the next 100 pages given to individual tube performance data. The final 16 pages cover tube testing, suggested circuits including 9 receivers, four audio amps and a microphone preamp. Operating conditions for resistance coupled A-F amplifiers is summarized in a table and tube bulb profiles are supplied. A two-

page index completes the book. This manual RC-12 is an early historical snapshot of the growing tube technology in the United States, and a useful guide to the very early tubes which it details. It is especially useful to those who are restorers of antique equipment and a useful look at one period of thermionic valve development for any tube enthusiast.

This catalogue of the music of Charles Ives contains 728 entries covering all of the prolific composer's works. James Sinclair's book presents information produced by recent Ives scholarship and generous commentary on each of Ives's compositions. It completes the work begun by musicologist John Kirkpatrick in 1955, when Ives's music manuscripts were deposited in the Yale Music Library. Ives's works are arranged alphabetically by title within genres. Whenever possible, each entry includes the main title and any other

titles the composer may have used; the forces required; the duration; headings of movements; publication history; citation of the first known performance and first recording; the derivation of the work, listing music on which it may be modeled or from which it may borrow material; the principal literature treating the piece; and commentary on these and other matters. The catalogue also provides musical incipits for all Ives's extant works, seven appendixes (covering his work lists, 'Quality Photo' lists, his songbooks, a chronology of his life, recordings made by Ives, and his private publications and commercial publishers), three concordances, and four extensive indexes (addresses, names, titles, and musical borrowings).
