Discover the women behind the video games we love—the iconic games they created, the genres they invented, the studios and companies they built—and how they changed the industry forever. Women have always made video games, from the 1960s and the first-of-its-kind, projector-based Sumerian Game to the blockbuster Uncharted games that defined the early 2000s. Women have been behind the writing, design, scores, and engines that power one of the most influential industries out there. In *Gamer Girls*, now you can explore the stories of 25 of those women. Bursting with bold artwork, easy-to-read profiles, and real-life stories of the women working on games like *Centipede*, *Final Fantasy*, *Halo*, and more, this dynamic illustrated book shows what a huge role women have played—and will continue to play—in the creation of video games. With additional sidebars about other influential women in the industry, as well as a glossary and additional resources page, *Gamer Girls* offers a look into the work and lives of influential pixel queens such as: Roberta Williams (one of the creators of the adventure genre) Mabel Addis Mergardt (the first person to write a video game) Muriel Tramis (the French "knight" of video games) Keiko Erikawa (creator of the otome genre) Yoko Shimomura (composer for *Street Fighter*, *Final Fantasy*, and *Kingdom Hearts*) Rebecca Heinman (first national video game tournament champion) Danielle Bunten Berry (creator of *M.U.L.E.* and early advocate for multiplayer games) and more! Whether you're a gamer girl who plays video games, a gamer girl who makes video games, or a parent raising a gamer girl, this entertaining, inspiring book will have you itching to pick up a controller or create your own video games!

Those who have influence have power.

Unfortunately, the majority of the world's influence comes from forces of negative connotations. In this thought provoking book, we will address some of the things that have made the influence of the modern church weaken. We will also discuss innovative means in which we can take it back. Sometimes between cultures we lose communication. In order to bridge the gap, we must be willing to understand that it takes different methods to reach different people and our cookie cutter is not working. - Terrell Monger "Where is the freedom that we speak about so much in the church? It is a shame that before someone can freely discuss salvation we must first claim a denomination. We might as well be a gang and ask, "What set do you claim?" Didn't Christ die for us all? Then, why are we so separated?" - a 16 year old man at

The Canon PowerShot G16 compact digital camera is the successor to the successful G15 and the first in the G-series to come equipped with built-in Wi-Fi. This facility makes it ideal for sharing images and video on social networking websites, or via email through the Canon Image Gateway. Images can also be uploaded using the maker's compatible iOS(R) or Android device with the download of a free Canon CameraWindow app. The G16's 28-140mm wide-angle lens has an aperture range of f/1.8-f/2.8, making it ideal for shooting in low-light conditions or for capturing a dramatic shallow depth-of-field with soft backgrounds. The camera features Canon's HS System, which combines a DIGIC 6 image processor and a 12.1-megapixel High-Sensitivity CMOS image sensor. Autofocus (AF) times and reduced shooting lag are improved over previous G-series models and continuous shooting speeds of up to 9.3 frames-per-second are possible. The G16 captures 1080p/60p Full HD video and has a built-in stereo microphone and an HDMI output for viewing videos on an HDTV. New shooting modes include Star mode for capturing the night sky: Star Nightscape will capture stars in a landscape image, while Star Trails will capture trails of stars in a still image; Star Time Lapse Movie will shoot continuous

still images of stars and combine them into a video that replicates the motion of the stars in the sky. With the handheld HDR Scene mode multiple shots of a particular scene are combined to create a high dynamic range image without the need for a tripod. This mode includes Natural, Art Bold, Art Embossed, Art Standard and Art Vivid options. The dials and controls on this digital compact camera are styled similarly to those on Canon's range of EOS digital SLR cameras. The G16 is also compatible with Canon Speedlite flashes and select accessories.
