CHOICE Outstanding
Academic Title 2017 This
book examines the 1871

unification of Germany through 1815-1871 demonstrates that the prism of one of its 'forgotten states', the Kingdom of Württemberg. It moves beyond the traditional argument for the importance of the great powers of Austria and Prussia in controlling German destiny at this time. Bodie A. Ashton champions the significance of Württemberg and as a result all 38 German states in the unification process, noting that each had their own institutions and traditions that proved vital to the eventual shape of German unity. The Kingdom of Württemberg and the Making of Germany, 1815-1871 demonstrates that the state's government was dynamic and in full control of its own policy-making throughout most of the 19th century, with Ashton showing a keen appreciation for the state's domestic development during the period. The book traces Württemberg's strong involvement in the national question, and how successive governments and monarchs in the state's capital of Stuttgart manoeuvred the country so as to gain the greatest advantage. It successfully argues that the shape of German unification was not inevitable, and was in

fact driven largely by the desires of the Mittelstaaten, rather than the great powers; the eventual Reichsgründung of January 1871 was merely the final step in a long series of negotiations, diplomatic manoeuvres and subterfuge, with Württemberg playing a vital, regional role. Making use of a wealth of primary sources, including telegrams, newspaper articles, diary entries, letters and government documents, this is a vitally important study for all scholars and students of 19th-century Germany.
