What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about

our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at stake: who wants our data and why; the practices of

serious self-tracking enthusiasts; the design of commercial self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates.

Men in My Situation Little, Brown
Elmer Towns's *Fasting for Spiritual Breakthrough* has become must-reading as this powerful spiritual discipline of fasting has seen a revival among followers of Christ. Now Towns digs deeper into one of the most popular forms of fasting today, the Daniel Fast. With an emphasis on a healthy, simple diet, the Daniel Fast is named after the prophet Daniel who participated in a partial fast for spiritual purposes. Daniel was taken

captive into Babylon when he was sixteen years old. The Babylonian king wanted the young prophet to help him administer his rule over the captive Jews--and he wanted to "Babylon-ize" Daniel, to make the young man of God more like him. The first step the king took in his campaign was to provide a sumptuous feast to tempt Daniel--food fit for a king-- basically fattening comfort foods. In response, the prophet refrained from the king's table, choosing instead to eat only vegetables and to drink only water. He honored God over the king. Dr. Elmer Towns

introduces readers to the spiritual, physical, and mental basics of the Daniel Fast, coaching them through either a ten-day or twenty-one-day period of renewal, and he includes original Daniel Fast recipes created by executive chef John P. Perkins. Dr. Towns addresses practical questions, such as what to eat and when, as well as how to pray effectively. Readers will learn how to encounter God during their fast, how to worship through self-discipline, and how to pray for specific answers. They will also explore the role of weeping, repentance,

and spiritual warfare in their life of faith. Daniel is a model to God's people of someone who chooses spiritual nourishment over bodily satisfaction, in *The Daniel Fast for Spiritual Breakthrough*, God's people can learn to follow his example. *Drawing Realistic Pencil Portraits Step by Step* Penguin Random House South Africa Over 25 official crafting activities inspired by the Harry Potter films. people think of him, they think of his beautiful shots with the game on the line, his body totally in sync with the ball -- hitting nothing but net. But for all his greatness, this scion of a complex family from North Carolina's Coastal Plain has a darker side: he's a ruthless competitor and a lover of high stakes. There's never been a biography that encompassed the dual nature of his character and looked so deeply at Jordan on and off the court -- until now. Basketball journalist Roland Lazenby spent almost thirty years covering Michael Jordan's career in college and the pros. He witnessed Jordan's growth from a skinny rookie to the instantly recognizable global ambassador for basketball whose business savvy and success have millions of kids still wanting to be just like Mike. Yet Lazenby also witnessed the Michael Jordan whose drive and appetite are more fearsome and more insatiable than any of his fans could begin to know. Michael Jordan: The Life explores both sides of his personality to reveal the fullest, most compelling story of the man who is Michael Jordan. Lazenby draws on his

personal relationships with Jordan's coaches; countless interviews with Jordan's friends, teammates, and family members; and interviews with Jordan himself to provide the first truly definitive study of Michael Jordan: the player, the icon, and the man.

Written after his
wife's tragic death as
a way of surviving the
"mad midnight moment,"
A Grief Observed is
C.S. Lewis's honest
reflection on the
fundamental issues of
life, death, and faith
in the midst of loss.
This work contains his
concise, genuine

reflections on that
period: "Nothing will
shake a man -- or at
any rate a man like me
-- out of his merely
verbal thinking and his
merely notional
beliefs. He has to be
knocked silly before he
comes to his senses.
Only torture will bring

under torture does he
discover it himself."
This is a beautiful and
unflinchingly honest
record of how even a

meaning in the
universe, and how he

can gradually regain
his bearings.

Manifesto of the

Karl Heinrich Marx
and Friedrich
Engels is a book
where, for the
first time, the
aims, tasks and
methods of fight of
the emerging

parties of the nineteenth century were declared and explained. It is the greatest philosophic and political treatise that is important in some way even nowadays. According to experts, Manifesto is a powerful work that still can be used as a good method to mobilize people. In addition, the work of Marx and Engels

will not leave anyone indifferent. Historians noted that this book had been ahead of time. Manifesto definitely opened the eyes and minds of workers and socialists all over the world.

A searing portrayal of Vienna's bourgeoisie, it begins with the arrival of an unnamed writer at an 'artistic dinner' hosted by a composer and his society wife—a couple he once admired and has come to loathe. The guest of honor, a distinguished actor from the Burgtheater, is

late. As the other guests wait impatiently, they are seen through the critical eye of the writer, who narrates a silent but frenzied tirade against these former friends, most of whom have been brought together by Joana, a woman they buried earlier that day. Reflections on Joana's life and suicide are mixed

with these denunciations until the famous actor arrives, bringing an explosive end to the evening that even the writer could not have seen coming.

A defense of traditional philosophical method against challenges from practitioners of "experimental

philosophy." In *The Myth of the Intuitive*, Max Deutsch defends the methods of analytic philosophy against a recent empirical challenge mounted by the practitioners of experimental philosophy (xphi). This challenge concerns the extent to which analytic philosophy relies on intuition—in particular, the extent to which analytic philosophers

treat intuitions as evidence in arguing for philosophical conclusions. Experimental philosophers say that analytic philosophers place a great deal of evidential weight on people's intuitions about hypothetical cases and thought experiments. Deutsch argues forcefully that this view of traditional philosophical method is a myth, part of "metaphilosophical	folklore," and he supports his argument with close examinations of results from xphi and of a number of influential arguments in analytic philosophy. Analytic philosophy makes regular use of hypothetical examples and thought experiments, but, Deutsch writes, philosophers argue for their claims about what is true or not true in these	examples and thought experiments. It is these arguments, not intuitions, that are treated as evidence for the claims. Deutsch discusses xphi and some recent xphi studies; critiques a variety of other metaphilosophical claims; examines such famous arguments as Gettier's refutation of the JTB (justified true belief) theory and Kripke's Gödel Case argument against

descriptivism about proper names, and shows that they rely on reasoning rather than intuition; and finds existing critiques of xphi, the "Multiple Concepts" and "Expertise" replies, to be severely lacking.
