Bridging Technology and Literacy Teacher Created Materials

Get practical strategies and classroom-ready ideas to incorporate technology in the 6–12 curriculum to improve skills in reading, critical thinking and digital literacy. Due to the diversity of readers in today’s classrooms, teachers are called upon to teach not reading, but readers. Personalized Reading highlights four different types of readers -- the struggling reader, the reluctant reader, English learners and advanced readers -- and presents ways to use technology tools to accommodate their different reading styles. With this book, you’ll get answers to questions like: How can teachers meet the needs of all learners to help them think critically and communicate effectively? How can teachers approach reading of visual, print and digital text? This book will:

- Help teachers empower students with the skills and strategies they need for reading success, and to find joy in reading.
- Inspire teachers to think beyond the text to help meet students where they are and raise the level of thinking about teaching readers.
- Provide activities and lessons to help support the diverse learners that enter the classroom, and highlight a variety of technology tools to tap into the multifaceted texts students can access. With this book, secondary teachers will develop the skills they need to help students select their own texts, conduct reading workshops and teach students to read both print and visual texts, while identifying what works best for each student to maximize learning and potential.

Research on history instruction and learning is emerging as an exciting new field of inquiry. The editors prepared this volume because the field is at an important moment in its development -- a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces. The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics. However, the newer research goes beyond these activities as well. Where traditional research approaches to social studies instruction and learning have focused on curriculum, they have avoided the study of purely disciplinary features, the textual components of history and the concomitant demands, as well as the nature of various learners. Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction, they have avoided topics such as perspective-taking, interpretation, and rhetorical layerings. The new work, by contrast, has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations. The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as: * What affects the quality of teaching? * How are historical documents interpreted in the writing of history? * How is history explained? * What are the classroom demands on an elementary school social studies teacher? * What does text accomplish or fail to accomplish in educational settings? * How do teachers think about particular topics for history teaching? Although much of the research reflects a grounding in, or the influence of, cognitive psychology, not all of it derives from that tradition. Traditions of rhetoric, curriculum analysis, and developmental psychology are also woven throughout the chapters. The editors envision this volume as a contribution to educational research in a subject matter, and as a tool for practitioners concerned with the

improvement of instruction in history. They also anticipate that it will contribute to cognitive science.

Educators across content areas have turned to *Classroom Strategies for Interactive Learning* for almost two decades. This fully updated fourth edition delivers rich, practical, research-based strategies that readers have found invaluable in the context of today's classrooms. Doug has written all-new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following: Understand the research base for comprehension strategies in content classrooms. Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge. Show learners how to question a text. Teach reading and thinking through a disciplinary lens. At the heart of this edition are more than forty classroom strategies, with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking/listening, and language standards.

This book is designed to support K-5 classroom teachers as they integrate music throughout the elementary curriculum. It contains detailed, practical ideas and examples, including full lesson plans and over 100 teaching ideas and strategies for integrating music with visual art, language arts, social studies, science, and mathematics. Following an overview of the interdisciplinary approach, the remaining chapters explore connections between music and other areas of the elementary curriculum. Each chapter also includes a section addressing national standards with tables showing the specific standards that are included in each lesson and activity. This text utilizes the most recent National Core Arts Standards (2015) as well as the most recent standards in mathematics, science, social studies, and language arts. All the lessons in this book are designed to be fully taught by classroom teachers; the content is accessible to those who lack formal music training, yet is solidly rooted in research and best practices. While classroom teachers can teach these lessons on their own, this book may facilitate partnerships and collaboration between classroom teachers and music specialists. All the lessons and activities included in this text have been reviewed by practicing teachers and most have been field tested in elementary classrooms. Throughout the book, there is an emphasis on interdisciplinary lessons that demonstrate valid connections between disciplines while maintaining the integrity of each discipline involved, including a teacher-tested model that allows teachers to successfully create their own interdisciplinary lessons.
