The process-oriented guide to context-sensitive site selection, planning, and design Sustainable design is responsive to context. And each site has a unique set of physical, biological, cultural, and legal attributes that presents different opportunities and constraints for alternative uses of the site. Site analysis systematically evaluates these on-site and off-site factors to inform the design of places—including neighborhoods and communities—that are attractive, walkable, and climate-resilient. This Third Edition of Site Analysis is fully updated to cover the latest topics in low-impact, location-efficient design and development. This complete, user-friendly guide: Blends theory and practice from the fields of landscape architecture, urban planning, architecture, geography, and urban design Addresses important sustainability topics, including LEED-ND, Sustainable Sites, STAR community index, and climate adaptation Details the objectives and visualization methods used in each phase of the site planning and design process Explains the influence of codes, ordinances, and site plan approval processes on the design of the built environment Includes more than 200 illustrations and eight case studies of projects completed by leading planning and design firms Site Analysis, Third Edition is the ideal guide for students taking courses in site analysis, site planning, and environmental design. New material includes review questions at the end of each chapter for students as well as early-career professionals preparing for the ARE, LARE, or AICP exams.

Unlike existing textbooks written for law students on specific subjects impacting real estate transactions, Real Estate Law: Fundamentals for The Development Process uses "The Development Process" as a framework for understanding how the U.S. legal system regulates, facilitates, and generally impacts real estate transactions and their outcomes. This book not only addresses the nature of specific legal issues directly relating to real estate transactions but also how those issues may best be identified and addressed

in advance. This book breaks down the myriad of laws influencing the selection, acquisition, development, financing, ownership, and management of real estate, and presents them in context. Readers of Real Estate Law will gain a practical understanding, from the perspective of a real property developer or real estate executive, investor, or lender, of: how to identify potential legal issues before they arise; when to involve a real estate attorney; how to select an attorney with the appropriate, relevant experience; and how to efficiently and economically engage and manage legal counsel in addressing real estate issues. Written as a graduate-level text book, Real Estate Law comes with numerous useful features including a glossary of terms, chapter summaries, discussion questions, further reading, and a companion website with instructor resources. It is a resource of great value to real estate and finance professionals, both with and without law degrees, engaged in one aspect or another of real estate development and finance, who want to become more conversant in the legal issues impacting these transactions.

An Introduction to Real Estate Finance serves as the core of knowledge for a single-semester first course in real estate finance. Unlike other real estate finance textbooks, with their encyclopedic but often stale details, it combines a short traditional text with a living website. The book gives students and professors highly applied information, and its regularly updated online features makes it especially useful for this practitioner-oriented audience. It covers fundamental topics such as accounting and tax, mortgages, capital markets, REITs and more. It also addresses the 2008 financial crisis and its impact on the real estate profession. This text is a valuable companion for students of real estate finance as well as financial analysts, portfolio managers, investors and other professionals in the field. Offers a concise, efficient, "finance-centric" alternative to traditional real estate finance texts Website gives readers the tools to find current information about their own areas of specialization—a unique approach not found in other real estate finance textbooks Gives students and professors the material to examine every subject in broad and highly detailed terms
