As the author explains, learner-centered teaching

focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. **Learner-Centered Teaching** shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.
