PLAZAS: LUGAR DE ENCUNTROS, 5th Edition, is a two- or three-semester introductory Spanish program designed to support and enhance your students' language learning experience. PLAZAS transports your students to a Spanish-speaking country or region for an authentic and personalized cultural language-learning experience. Culture is embedded into every page of PLAZAS, giving your students an appreciation of different cultural practices and perspectives. Thanks to an exclusive partnership with the National Geographic Society, the fifth edition facilitates multi-modal interactions with cultural information in new and revised sections. The program's pedagogy continues to be firmly rooted in the research of the National Standards for Foreign Language Learning, or the Five Cs--Communication, Cultures, Connections, Comparisons, and Communities. The new A explorar! section draws upon all five standards in an engaging manner while previewing the content of the lesson. First published in 2003. Children's Friendship Training is a complete manualized guide for therapists treating children with peer problems. This unique, empirically validated treatment is the first to integrate parents into the therapy process to ensure generalization to school and home. Representing over twelve years of research, Children's Friendship Training presents the comprehensive social skills training program developed by these pioneering authors. Step-by-step interventions help children develop the skills to initiate mutually satisfying social interactions. These interactions can lead to higher regard within the peer group and the development of satisfying dyadic relationships that will, in turn, serve to enhance overall well being. Clinical and empirical rationales, illustrative case examples and parent handouts that educate parents and give specific guidelines for homework assignments are presented for each treatment module. Brief relevant reviews of the child development literature and selective reviews of assessment techniques and other approaches to children's social skills training are presented to sufficiently acquaint therapists interested in implementing children's friendship training.

 Outstanding Academic Title, Choice Magazine The staggering toll of gun violence—which claims 31,000 U.S. lives each year—is an urgent public health issue that demands an effective evidence-based policy response. The Johns Hopkins University convened more than 20 of the world's leading experts on gun violence and policy to summarize relevant research and recommend policies that are both constitutional and have broad public support. Collected for the first time in one volume, this reliable, empirical research and legal analysis will help lawmakers, opinion leaders, and concerned citizens identify policy changes to address mass shootings, along with the less-publicized gun violence that takes an average of 80 lives every day. Selected recommendations include: • Background checks: Establish a universal background check system for all persons purchasing a firearm from any seller. • High-risk individuals: Expand the set of conditions that disqualify an individual from legally purchasing a firearm. • Mental health: Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual. • Trafficking and dealer licensing: Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales

or other laws. • Personalized guns: Provide financial incentives to states to mandate childproof or personalized guns. • Assault weapons and high-capacity magazines: Ban the future sale of assault weapons and the future sale and possession of large-capacity ammunition magazines. • Research funds: Provide adequate federal funds to the Centers for Disease Control and Prevention, National Institutes of Health, and National Institute of Justice for research into the causes and solutions of gun violence. The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

This open access book explores creative and collaborative research methods within the social sustainability sciences. The term co-creativity is used in reference to both individual methods and overarching research approaches that, through socially inclusive forms of action and reflection, stimulate alternative understandings of why and how things are, and how they could be. Supported by a wide-ranging series of in-depth-including chapters on militant research and guerrilla narrative, decolonial participative approaches, appreciate inquiry and care-ethics, deep-mapping, photo-voice, community-arts, digital participatory mapping, and living labs-the edited collection critically reviews the potential of creative, collaborative and transdisciplinary forms of research praxis to nurture just and transformative processes of change. This includes considering the role of narrative, creative workshops, visual and arts-based forms of research in contributing to engaged scholarship, as well also as a range of methods from field of critical cartography. The positionality of the researcher, together with the emotional and embodied dimensions of 'doing' transdisciplinary research are threads which run throughout the collection. So too does the question of how to communicate sustainability science research in meaningful way.

"McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies." —The Boston Globe "Powerful and provocative . . . McGonigal makes a persuasive case that games have a lot to teach us about how to make our lives, and the world, better." —San Jose Mercury News "Jane McGonigal's insights have the elegant, compact, deadly simplicity of plutonium, and the same explosive force." —Cory Doctorow, author of Little Brother A visionary game designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, Reality Is Broken shows that the future will belong to those who can understand, design, and play games. Jane McGonigal is also the author of SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More Resilient.

Fifty years after its first publication, the multimillion-copy international bestseller is available again in English, sharing the heartbreaking tale of a gifted, mischievous, direly misunderstood boy growing up in Rio de Janeiro. When Zezé grows up, he wants to be a poet in a bow tie. For now the precocious young boy entertains himself by playing clever pranks

on the residents of his Rio de Janeiro neighborhood, stunts for which his parents and siblings punish him severely. Lately, with his father out of work, the beatings have become harsher. Zezé's only solace comes from his time at school, his hours secretly spent singing with a street musician, and the refuge he finds with his precious magical orange tree. When Zezé finally makes a real friend, his life begins to change, opening him up to human tenderness but also wrenching sorrow. Never out of print in Brazil since it was first published in 1968, *My Sweet Orange Tree*, inspired by the author's own childhood, has been translated into many languages and has won the hearts of millions of young readers across the globe.

This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO2 and N2O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.
