*Routledge Handbook of Public Procurement Corruption* Juris Publishing, Inc.

The Routledge Handbook of Public Procurement Corruption showcases the most innovative and exciting research being conducted in this important area of study, providing a comprehensive go-to reference for all who are interested in the topic. During the COVID-19 pandemic, the global race for health and ancillary goods amid global supply chain disruptions demonstrated that, when tested, all countries are incredibly vulnerable to fraud and corruption in public procurement, irrespective of their level of development. Yet despite the widespread nature of the problem,

there remains a lack of in-depth, analytical, and cross-country investigations into public procurement corruption. This book addresses this gap by providing a comprehensive, multidisciplinary, geographically balanced treatise on corruption in public procurement. It combines country-specific studies to allow readers to easily compare differing perspectives and approaches and overarching thematic chapters to reflect on new and cutting-edge issues in procurement and their implications for procurement corruption. Key sectors such as healthcare and infrastructure are considered, as well as the role of new technologies, in both combatting and enabling procurement corruption. This Handbook provides academics, practitioners, and graduate researchers of public administration, law, and anti-corruption with all of the tools they need to understand the nuances of public procurement corruption around the world.

As the Grim Reaper pulls a student out of class to be a "victim" of drunk driving in a program called "Every 15 Minutes," Montana Miller observes the ritual through a folklorist's lens.

Playing Dead examines why hundreds of American schools and communities each year organize these mock tragedies without any national sponsorship or coordination. Often, the event is complete with a staged accident in the parking lot, a life-flight helicopter, and faux eulogies for the "dead" students read in school assemblies. Grounding her research in play theory, frame theory, and theory of folk drama, Miller investigates key aspects of this emergent tradition, paying particular attention to its unplanned elements—enabled by the performance's spontaneous nature and the participants' tendency to stray from the intended frame. Miller examines such variations in terms of the program as a whole, analyzing its continued popularity and weighing its success as perceived by participants. Her fieldwork reveals a surprising aspect of Every 15 Minutes that typical studies of ritual do not include: It can be fun. Playing Dead is volume two of the series Ritual, Festival, and Celebration, edited by Jack Santino.

Audio production is an incredibly rewarding craft. To take the raw, basic tracks of a fledgling idea and shape them into one glorious stereophonic sound wave is an amazing feat. The transformation from analogue to digital dominance has brought many advances in sound quality and new techniques, but producing digital music with only a standard computer and DAW can be problematic, time-consuming and sometimes disappointing without the right approach and skills. In *Template Mixing and Mastering*, renowned mix engineer Billy Decker tackles the challenges of in-the-box production through his innovative template approach. He shares his passion and knowledge from over twenty years of industry experience, including an introduction to templates and a step-by-step guide to their set-up and a discussion of drum replacement technology. Channel and setting information for each of the drum, instrument and vocal sections of his template is discussed along with the master channel and his methodology of mixing and mastering. Finally, he gives professional advice and best practice.
