After this thorough grounding in theory, Harvey looks, in Section 2, at 'Rebel Cities' (P113). From the Paris Communes to the role of Barcelona in the Spanish Civil War to the Prague Spring and the recent rebellions and revolts in Cochabamba, Tahrir Square and El Alto, the urban environment is where active resistance to the counter-revolutionary neoliberal forces happens.

*Rebel Cities - Verso*

In 'Rebel Cities', David Harvey re-examines and interprets the basis of

capitalist accumulation to show its essentially urban roots. This is

certainly a wide and sweeping project and it is largely convincing.

Harvey builds on the work of Henri Lefebvre, a French Marxist who

wrote in the 1960s. Lefebvre coined or popularized the phrase "right to the city."
