In the 1860s, the Russo-American Telegraph Company set out to telegraphically connect the United States and Europe using lines running through the Bering Straits and Siberia. The failed expedition marked one of the first explorations of the vast Siberian wilderness, and George Kennan's tale of a seemingly endless land filled with wildlife and nomadic tribes is as entertaining today as it was 140 years ago. With biting humor and poignant insight, Kennan details his years fighting to survive a doomed mission. He depicts the quiet loneliness of the desolate landscape, the eerie glow of the sun at midnight, and the refusal to give in to one of the harshest places man has ever tried to conquer. His book is a testament to our planet's beauty and danger, as well as to the tireless will of the human spirit.

During the Napoleonic Wars the supreme battlefield shock weapon was the heavy cavalry – the French cuirassiers, and their British, Austrian, Prussian and Russian counterparts. Big men mounted on big horses, the heavy cavalry were armed with swords nearly a metre long, used for slashing or thrusting at their opponents; many wore steel armour, a practice revived by Napoleon. They were tasked with smashing a hole in the enemy's line of battle, with exploiting a weakness, or with turning a flank. Their classic manoeuvre was the charge; arrayed in close-order lines or columns, the heavy cavalry would begin their attack at the walk, building up to a gallop for the final 50 metres before impact. Illustrated with diagrams, relevant paintings and prints and specially prepared colour plates, this is the first volume of a two-part study of the cavalry tactics of the armies of Napoleon and those of his allies and opponents. Written by a leading authority on the period, it draws upon drill manuals and later writings to offer a vivid assessment of how heavy cavalry actually fought on the Napoleonic battlefield.

In the early 1300's the village of Montailou-and the surrounding mountainous region of Southern France-was full of heretics. When Jacquest Fournier, Bishop of Pamiers, launched an elaborate Inquisition to stamp them out, the peasants and shepherds he interrogated revealed, along with their position on official Catholicism, many details of their everyday life. Basing his absorbing study on these vivid, carefully recorded statements of peasants who lived more than 600 years ago-Pierre Clergue, the powerful village priest and shameless womanizer is even heard explaining his techniques of seduction- eminent historian Le Roy Ladurie reconstructs the

The Mediterranean Tradition in Economic

Thought surveys the legacy of thinking on economic affairs from the countries in the Mediterranean basin over four millenia. It considers the economic content of the scriptures of the Mesopotamian civilisations, Pharaonic Egypt and the Biblical peoples and the contributions of the Greeks and Romans, and their influence on Islamic civilisation and on the Medieval scholastics. The flowering of the school of Salamanca as recently as the seventeenth century demonstrates how long-lived the tradition was, and throughout Baek demonstrates how these ideas continue to survive and resurface, citing the renewed interest in the ethical dimension of economics, the revival of interest in the history of Islamic thought, and the re-emergence of Slavophile doctrines in contemporary Russian.

The growth of serious interest during the last fifty years in the scholastic contribution to the development of economic thought has been very marked, and no-where more so than in the history of economic thought in Spain. First published in 1978, this book begins in the Middle Ages and traces the effect on business practice and on thought of the presence of the Christian, Islamic and Jewish communities who lived side by side in the Peninsula. It shows how the economics of Plato and Aristotle were transmitted by way of Toledo to the Latin West. In the second half of the book the author considers e~Salamanca(tm) ideas and the views of the political economists and e~projectorse(tm) who preceded the Enlightenment. At the same time she surveys the present state of the subject and offers bibliographical guidance for the reader. Montailou, the Promised Land of Error Hassell Street Press

This book is a collection of papers on the origins of economic thought discovered in the writings of some prominent Islamic scholars, during the five centuries prior to the Latin Scholastics, who include St. Thomas Aquinas. This period of time was labelled by

Joseph Schumpeter as representing the 'great gap' in economic history. Unfortunately, this 'gap' is well embedded in most relevant literature. However, during this period the Islamic civilization was one of the most fertile grounds for intellectual developments in various disciplines, including economics, and this book attempts to fill that blind-spot in the history of economic thought.
