CodeNotes provides the most succinct, accurate, and speedy way for a developer to ramp up on a new technology or language. Unlike other programming books, CodeNotes drills down to the core aspects of a technology, focusing on the key elements needed in order to understand it quickly and implement it immediately. It is a unique resource for developers, filling the gap between comprehensive manuals and pocket references. CodeNotes for Web-Based UI shows how to build sophisticated, high-performance UIs for web-based applications using technologies such as JavaScript, DHTML, and CSS as well as XML and XSLT. It also details how to leverage technology and solve common web-based presentation and manipulation problems. Web designers and programmers will both develop a better understanding of common web-based design challenges, and discover some common approaches to solving these problems. This edition of CodeNotes includes: -A global overview of a technology and explanation of what problems it can be used to solve -Real-world examples -"How and Why" and "Design Notes" sections that provide hints, tricks, workarounds, and tips on what should be taken advantage of or avoided -Instructions and classroom-style tutorials throughout from expert trainers and software developers Visit www.codenotes.com for updates, source code templates, access to message boards, and discussion of specific problems with CodeNotes authors and other developers. Every CodeNotes title is written and reviewed by a team of commercial software developers and technology experts. See "About the Authors" at the beginning of the book for more information.

This book provides an understanding of the principles of artistic design as they relate to the web, followed by the application of those design principles using Adobe® Dreamweaver and resulting in the ability to create effective websites. Tailored to users of either CS3, CS4, or the latest version of Dreamweaver, CS5, each chapter is comprised of three sections: new concepts; "reinforcing your knowledge" through projects and exercises; and a "build your own

website" section designed to offer the reader the opportunity to build their own website using the concepts from each chapter. By the end of the book, the reader will have their very own website! The book starts with an introduction to the principles of design unique to the web, and then progresses to the incorporation of those principles into Adobe Dreamweaver for aesthetically pleasing web design. In fact, several chapters of this four-color, heavily illustrated text are devoted to web design from an artist's perspective. The author discusses understanding the psychological influence of colors, web typography and the voice of type, the principles of design as they relate to the web, and how to maximize the potential of the graphic programs the readers are already familiar with to create effective graphics, creative navigation, and more. This text brings the reader through the design stage from initial concept to graphic preparation, followed by the importing of graphics or whole pages into Dreamweaver for building the site and uploading it to the Internet. Although no programming knowledge is required, a chapter on HTML and other web programming fundamentals is included. A CD-ROM with images, sample web pages, and more accompanies the book. An instructor's resource kit is available upon adoption as a text.

The classic survey design reference, updated for the digital age For over two decades, Dillman's classic text on survey design has aided both students and professionals in effectively planning and conducting mail, telephone, and, more recently, Internet surveys. The new edition is thoroughly updated and revised, and covers all aspects of survey research. It features expanded coverage of mobile phones, tablets, and the use of do-it-yourself surveys, and Dillman's unique Tailored Design Method is also thoroughly explained. This invaluable resource is crucial for any researcher seeking to increase response rates and obtain high-quality feedback from survey questions. Consistent with current emphasis on the visual and aural, the new edition is complemented by copious examples within the text and accompanying website. This heavily revised Fourth Edition includes: Strategies and tactics for determining the needs of a given survey, how to design it, and how to effectively administer it How and when to use mail, telephone, and Internet surveys to maximum advantage Proven techniques to increase response rates Guidance on how to obtain high-quality feedback from mail, electronic, and other self-administered surveys Direction on how to construct effective questionnaires, including considerations of layout The effects of sponsorship on the response rates of surveys Use of capabilities provided by newly mass-used media: interactivity, presentation of aural and visual stimuli. The Fourth Edition reintroduces the telephone—including coordinating land and mobile. Grounded in the best research, the book offers practical how-to guidelines and detailed examples for practitioners and students alike. "O'Reilly Media, Inc."

nd The 2 International Conference on Web-Based Learning (ICWL 2003) took place in Melbourne, Australia. ICWL 2003 followed the tradition of the successful ICWL 2002 held in Hong Kong and aimed at providing an in-depth study of the technical and pedago- cal issues, as well as incorporating management issues of Web-based learning. Additionally, there was a focus on issues of interest to the learner, o?ering the optimal Web based learning environment to achieve high academic results. - akin University organized this conference in conjunction with the Hong Kong WebSociety, toprovideaforumwhichgatherededucators, researchers, techno- gists and implementers of Web-based learning from around the world to discuss, collaborate and advance all relevant issues pertaining to this area of research. The main focus of ICWL 2003 was on the most critical areas of Web-based learning, in particular, Web-based learning environments, virtual universities, pedagogical issues related to Web-based learning, multimedia-based e-learning, interactive e-learning systems, intelligence in on-line education, e-learning so- tions, CSCL, and authoring tools for e-learning. In total, the conference received 118 papers from researchers and practitioners from

13 countries. Each paper was reviewed by at least three internationally renowned referees. Papers were rigorously examined and selected based on their originality, significance, correctness, relevance, and clarity of presentation. Among the high-quality submissions, 50 papers were accepted and included in the proceedings. Later, the proceedings editors will recommend that some high-quality papers from the conference be published in a special issue of an international journal.
