a model employee of the Defense Intelligence Agency (DIA). Known to her coworkers as the Queen of Cuba, she was an overachiever who advanced quickly through the ranks of Latin American specialists to become the intelligence community's top analyst on Cuban affairs. But throughout her sixteen-year career at DIA, Montes was sending Castro some of America's most closely guarded secrets and at the same time helping influence what the United States thought it knew about Cuba.

When she was finally arrested in September 2001, she became the most senior American intelligence official ever accused of operating as a Cuban spy from within the federal U.S. government. Unrepentant as she serves out her time in a federal prison in Texas, Montes remains the only member of the intelligence community ever convicted of espionage on behalf of the Cuban government. This inside account of the investigation that led to her arrest has been written by Scott W. Carmichael, the DIA's senior

counterintelligence investigator who persuaded the FBI to launch an investigation. Although Montes did not fit the FBI's profile of a spy and easily managed to defeat the agency's polygraph exams, Carmichael became suspicious of her activities and with the FBI over a period of several years developed a solid case against her. Here he tells the story of that long and ultimately successful spy hunt. Carmichael reveals the details of their efforts to bring her to justice, offering

---

readers a front-row seat for the first major U.S. espionage case of the twentieth century. She was arrested less than twenty-four hours before learning details of the U.S. plan to invade Afghanistan post-September 11. Motivated by ideology not money, Montes was one of the last "true believers" of the communist era. Because her arrest came just ten days after 9/11, it went largely unnoticed by the American public. This book calls attention to the grave damage Montes inflicted on

U.S. security—Carmichael even implicates her in the death of a Green Beret fighting Cuban-backed insurgents in El Salvador—and the damage she would have continued to inflict had she not been caught.

Marriage. It's a double-edged sword, or at least it is for Nikki Heat. Her husband, Pulitzer Prize winning journalist Jameson Rook, infuriates her in a way no one else in her entire life has ever done. But most of all, she loves the man with all her heart and she'd do anything to protect him. Which is just what she had done not so long ago. It

had almost cost them everything. Now, Rook is given the honour to be a visiting professor at his alma mater, and he can't pass up the opportunity to mentor burgeoning writers at his former award-winning college newspaper. Shortly after his arrival on campus, a female reporter for the paper is found dead...naked...in Rook's bed. Dealing with betrayal from any man is not Nikki's style. She and Jameson have had plenty of

conflicts during their complicated relationship, but none like this. Is her husband keeping secrets of his own, or can she really trust him? In order to find out, Nikki gives Jameson the benefit of the doubt and digs into Jameson's theory of a secret society within a secret society. of Blood and Sand explores the vital question of how a society remembers—and confronts—the past. In 2020, history came tumbling down. From the US and the UK to Belgium, New Zealand, and Bangladesh, Black Lives Matter protesters defaced, and in some cases, hauled down statues of Confederate icons, slaveholders, and imperialists. General Robert E. Lee, head of the Confederate Army, was covered in graffiti in Richmond, Virginia. Edward

Colston, a member of Parliament and slave trader, was knocked off his plinth in Bristol, England, and hurled into the harbor. Statues of Christopher Columbus were toppled in Minnesota, burned and thrown into a lake in Virginia, and beheaded in Massachusetts. Belgian King Leopold II was set on fire in Antwerp and doused in red paint in Ghent. Winston Churchill's monument in London was daubed with the word "racist." As these iconic effigies

fell, the backlash was swift and intense. But as the past three hundred years have shown, history is not erased when statues are removed. If anything, Alex von Tunzelmann reminds us, it is made. Exploring the rise and fall of twelve famous, yet now controversial statues, she takes us on a fascinating global historical tour around North America, Western and Eastern Europe, Latin America and Asia, filled with larger than life characters and dramatic stories. Fidel Castro When Fidel Castro died on November 25, 2016, it seemed as if much of the world didn't quite know what to make
