Troubleshooting and Repairing Major Appliances, 2nd Ed. Penguin  
HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to [HVACTraining101.Com](http://HVACTraining101.Com) to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC

technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

This is a manual for Evangelical Christians who anticipate the “ second coming ” of Jesus Christ and understand that they may be called upon to endure some of the hardships of the End Times. It takes the genre of survival literature up a notch by addressing the moral, ethical and doctrinal questions that Christians should consider in planning for existential challenges in an uncertain future. The author doesn ’ t “ reinvent the wheel ” on common survival issues, but covers items of interest to Believers who want to develop a survival strategy that deals with the world as they find it, yet is consistent with their faith. Among these are: Does charity really “ begin at home? ” Is it righteous to use lethal force in defense of yourself and others? Does subscribing to the Pre-Tribulation Rapture mean that Believers need not be concerned about coping with the End Times?
