Excerpt from International Law Situations With Solutions and Notes, 1929 The discussions upon international law were, as in recent years, conducted under the auspices of the Naval War College authorities by George Grafton Wilson, LL. D., professor of international law in Harvard University, who also drew up the notes which are published in the present volume. The discussion aimed to consider the situations from the point of view of the belligerent on the offensive, the belligerent on the defensive, and the neutral. Excerpt from International Law Situations: With Solutions and Notes, 1932 It is now generally admitted that a neutral should not permit its territory to be used as a base by a belligerent, but it is not always clear as to what constitutes such use and illustrations of this fact may be found in practically every modern war. As a state is, in consequence of the allegiance of its subjects, under a degree of responsibility for their acts, these acts therefore must be supervised within and to a degree outside its jurisdiction. Excerpt from International Law Situations, With Solutions and Notes, 1933 Gentili extends these principles in the sixteenth century and takes up many of the questions arising from destination, proportion, and ownership of the cargo. The neutral began to demand that the evidence that the trade would be dangerous to the belligerent must also be clear not only from the nature of the goods themselves which might, if going to another neutral, be innocent, but that the goods if liable to capture must have an enemy destination. The nature of the goods and the destination thus became early determining factors in liability for contraband. **International Law Situations, with Solutions and Notes, 1933 (Classic Reprint)** Wentworth Press

Excerpt from International Law Situations: With Solutions and Notes; 1910 The international law situations discussed at the Naval War College in 1910, as in former years, were such as are likely to arise, in which naval officers may be required to act under urgent and difficult conditions, and in which the law and precedents are not well established. The Declaration of London has suggested certain questions, and for the purpose of these discussions it has been assumed to be binding. Mr. George Grafton Wilson, lately appointed professor of international law at Harvard, and still lecturer at Brown University, where he was for many years professor, who was himself a delegate to the International Naval Conference at London, conducted the discussions this year with the same ability and the same appreciation of the point of view of the naval officer that he has displayed for the past ten years as lecturer on international law at the Naval War College. Officers are invited to propose situations for future discussion, either cases that have occurred within their own experience or questions left unsettled by the recent Conventions of The Hague or by the Declaration of London. An index will shortly be published to the ten volumes on international law of the years 1901 to 1910, inclusive. Excerpt from Price's New English Grammar: Containing Also Punctuation, the Notes Under Rules in Syntax, and Lessons in Parsing; The Rules and Definitions Taken Mostly From Murray to All Which Is Adapted a New System of Questions The sale of the former editions of this work has encouraged the Editor to offer the public another, containing, as he would hope, some valuable improvements. The object of the questions interspersed through this Grammar, is, to lead the learner, while committing his lesson, to discover its meaning and application. The scholar should answer the questions which are numbered, in the common way. The questions which are not numbered, have no direct answer on the page; the design of which is, to teach the pupil to think for himself, and avail himself of his own resources, as soon as he shall have any at command. As some teachers have expressed a wish for this Grammar in the catechetical form, with questions and answers alternately succeeding each other, and as it seemed that one in such a form would be less conveniently read, the attempt has been made, by the help of figures, to secure the

advantages of that form, while its inconveniences are avoided. The number of the question is prefixed to its appropriate answer; and this arrangement will enable the scholar as readily to learn the answer, as if it followed its proper question. This edition also contains Punctuation, and the most important Notes in Murray's Syntax, with Lessons in Parsing, to which are prefixed Specimens illustrative of that, exercise, arranged in their appropriate places.
