Leaders in Curriculum Studies Oxford University Press on Demand
In the 1950s and 1960s school teaching became a university-based profession, and scholars and policy leaders looked to the humanities and social sciences in building an appropriate knowledge base. By the mid-1960s there was talk about a "new" philosophy, history, and sociology of education. Curriculum thinkers such as Joseph Schwab, Dwayne Heubner and Paul Hirst initiated new intellectual projects to supplement applied work in curriculum. By the 1970s the field was in the process of re-conceptualization, as a new generation of scholars provided deep critical insights into the social, political and cultural dynamics of school experience and templates for renewal of curriculum research and practice. In this book, 18 leading curriculum scholars since 1970 who remain influential today present the fascinating stories of their lives and important new contributions to the field. They trace their early experiences in teaching and curriculum development, creative directions in their work, mature ideas and perceptions of future directions for the field. Each chapter contains a list of works chosen by the authors as their personal favorites. This book offers an ideal companion to courses in curriculum studies and a guide for scholars seeking to understand the main currents in this field today. In a single volume it presents a bird's eye view of the entire field as told in the words of its leading figures. "This collection casts a bright light on the identity of the field of curriculum studies and its evolution. The essays make for wonderfully accessible and engaging reading. They are even more impressive in the fluency with which the authors use their individual histories to illuminate the field. We in the next cohort might take a page from their experiences, ideas, accomplishments, and sometimes explicit advice." From the Foreword by Reba Page

"In 1942, the federal government expelled more than 22,000 Japanese Canadians from their homes in British Columbia. From 1942 to 1949, they were dispossessed, sent to incarceration sites, and dispersed across Canada. Over 4,000 were deported to Japan. **Cartographies of Violence** analyses the effects of these processes for some Japanese Canadian women. Using critical race, feminist, anti-colonial, and cultural geographic theory, Mona Oikawa deconstructs prevalent images, stereotypes, and language used to describe the 'internment' in ways that masks its inherent violence. Through interviews with women survivors and their daughters, Oikawa analyses recurring themes of racism and resistance, as well as the struggle to communicate what happened. Disturbing and provocative, **Cartographies of Violence** explores women's memories in order to map the effects of forced displacements, incarcerations, and the separations of family, friends, and communities" --Publisher's website.

Monsters and the monstrous, whether from the remote pagan past or the new world of Christian Latin learning, haunted the Anglo-Saxon imagination in a variety of ways. In this series of detailed studies, Andy Orchard demonstrates the changing range of Anglo-Saxon attitudes towards the monstrous by reconsidering the monsters of Beowulf against the background of early medieval and patristic teratology and with reference to specific Anglo-Saxon texts. The immediate manuscript context of the monsters in Beowulf is analysed, shedding light on the poet's treatment of the theme of the monstrous and its integration into his work, and a series of parallel discussions consider a range of medieval treatments of the same theme in a variety of analogous texts (all provided with translation), in Latin, Old English, Middle Irish, and Old Icelandic. The twin themes of pride and prodigies are suggested by tracing changing attitudes towards the concept of pride and establishing a close link between the proud pagan warriors depicted in Christian tradition and the monsters they fight, and with whom they become increasingly identified. An appendix contains new editions and translations (some for the first time in English) of the Liber Monstrorum, The Letter of Alexander to Aristotle, and The Wonders of the East. Originally published in 1995 by Boydell & Brewer.

Music has long played a role in American presidential campaigns as a mode of both expressing candidates' messages and criticizing the opposition. The relevance of music in the 2016 campaign for the White House took various forms in a range of American media: a significant amount of popular music was used by campaigns, many artist endorsements were sought by candidates, ever changing songs were employed at rallies, instances of musicians threatening legal action against candidates burgeoned, and artists and others increasingly used music as a form of political protest before and after Election Day. The 2016 campaign was a game changer, similar to the development of music in the 1840 campaign, when "Tippecanoe and Tyler Too" helped sing William Harrison into the White House. The ten chapters in this collection place music use in 2016 in historical perspective before examining musical messaging, strategy, and parody. The book ultimately explores causality: how do music and musicians affect presidential elections, and how do politicians and campaigns affect music and musicians? The authors explain this interaction from various perspectives, with methodological approaches from several fields, including political science, legal studies, musicology, cultural studies, rhetorical studies, and communications and journalism. These chapters will help the reader understand music in the 2016 election to realize how music will be relevant in 2020 and beyond.

COMPLEX VARIABLES Michael R. Hicks

This book analyses the principles underlying the construction and application of a number of boilerplate and other clauses commonly included in commercial contracts. The first Part of the work deals with general principles of interpretation. It then considers clauses which allocate commercial risk; clauses relating to performance; clauses introducing new parties by way of assignment, novation or nomination; clauses such as guarantees and indemnities which create liabilities in third parties; and dispute resolution clauses including governing law. The authors highlight common issues surrounding the application of these clauses in practice and, where appropriate, make drafting recommendations based on their analysis of case law and the operation of relevant statutes. This is a very accessible resource for all commercial practitioners.

Odin's Whisper provides the first full treatment of this subject, giving an in-depth account that uses the stories of Norse mythology and the most recent archaeological evidence to draw a vivid picture of the Viking mind. Neil Price contextualizes their understanding of death within the Ragnar ö k, the immense battle of living and dead, gods and humans that would ultimately consume all the world in fire, to illustrate that the Vikings' conception of the afterlife was only ever viewed as a respite before this ultimate end. The violence and extravagance that marked their conception of the afterlife equally informed their funeral practice, as Price illustrates with blood-curdling contemporary accounts of the sacrifices and rapes that occasionally marked Viking burial.
