### Don't Forget to Breathe Relapse

David Carr was an addict for more than twenty years -- first dope, then coke, then finally crack -- before the prospect of losing his newborn twins made him sober up in a bid to win custody from their crack-dealer mother. Once recovered, he found that his recollection of his 'lost' years differed -- sometimes radically -- from that of his family and friends. The night, for example, his best friend pulled a gun on him. 'No,' said the friend (to David's horror, as a lifelong pacifist), 'It was you that had the gun.' Using all his skills as an investigative reporter, he set out to research his own life, interviewing everyone from his parents and his ex-partners to the policemen who arrested him, the doctors who treated him and the lawyers who fought to prove he was fit to have custody of his kids. Unflinchingly honest and beautifully written, the result is both a shocking account of the depths of addiction and a fascinating examination of how -- and why -- our memories deceive us. As David says, we remember the stories we can live with, not the ones that happened.

### Leaving Dirty Jersey Hachette Books

This compelling, honest book investigates the growing epidemic of prescription painkiller abuse among today's Generation Rx. Through gripping profiles and heartbreaking confessions, this memoir dares to uncover the reality--the addiction, the withdrawal, and the recovery--of this newest generation of pill poppers. Joshua Lyon was no stranger to substance abuse. By the time he was seventeen, he had already found sanctuary in pot, cocaine, Ecstasy, and mushrooms--just to name a few. Ten years later, on assignment for *Jane* magazine, he found himself with a two-inch-thick bottle of Vicodin in his hands and only one decision to make: dispose of the bottle or give in to his curiosity. He chose the latter. In a matter of weeks he'd found his perfect drug. In the early half of this decade, purchasing painkillers without a doctor was as easy as going online and checking the spam filter in your inbox. The accessibility of these drugs--paired with a false perception of their safety--contributed to their epidemic-like spread throughout America's twenty-something youth, a group dubbed Generation Rx. *Pill Head* is Joshua Lyon's harrowing and bold account of this generation, and it's also a memoir about his own struggle to recover from his addiction to painkillers. The story of so many who have shared this experience--from discovery to addiction to rehabilitation--*Pill Head* follows the lives of several young people much like Joshua and dares to blow open the cultural phenomena of America's newest pill-popping generation. Marrying the journalist's eye with the addict's mind, Joshua takes readers through the shocking and often painful profiles of recreational users and suffering addicts as they fight to recover. *Pill Head* is not only a memoir of descent, but of endurance and of determination. Ultimately, it is a story of encouragement for anyone who is wrestling to overcome addiction, and anyone who is looking for the strength to heal.

### Cured Hachette Books

When it comes to disease, who beats the odds — and why? When it comes to spontaneous healing, skepticism abounds. Doctors are taught that "miraculous" recoveries are flukes, and as a result they don't study those cases or take them into account when treating patients. Enter Dr. Jeff Rediger, who has spent over 15 years studying spontaneous healing, pioneering the use of scientific tools to investigate recoveries from incurable illnesses. Dr. Rediger's research has taken him from America's top hospitals to healing centers around the world—and along the way he's uncovered insights into why some people beat the odds. In *Cured*, Dr. Rediger digs down to the root causes of illness, showing how to create an environment that sets the stage for healing. He reveals the patterns behind healing and lays out the physical and mental principles associated with recovery: first, we need to physically heal our diet and our immune systems. Next, we need to mentally heal our stress response and our identities. Through rigorous research, Dr. Rediger shows that much of our physical reality is created in our minds. Our perception changes our experience, even to the point of changing our physical bodies—and thus the healing of our identity may be our greatest tool to recovery. Ultimately, miracles only contradict what we know of nature at this point in time. *Cured* leads the way in explaining the science behind these miracles, and provides a first-of-its-kind guidebook to both healing and preventing disease.
