Earth Science  
relative dating lab  
quiz Question 1  
1. The geologic history revealed in Figure 4 is as follows: Layers G, C, A and F were deposited. A normal fault B cut layers G, C, A and F. A period of erosion followed which created an unconformity. F was completely eroded away except in the area where it had been down-faulted. H, D and I were deposited and finally, Fault E occurred. Determining the Age of Rocks and Fossils relative age dating definitions will be provided but the

technique for teaching the definitions is completely up to you. Some people like to draw diagrams on the board and others like to use layers of clay. Either way, the main purpose of the handout is to serve as reference material. I. Introduction to relative age dating. a.

Who's on First? A Relative Dating Activity is a hands on exercise which introduces students to the concepts of

sequencing and using fossils to establish relative dates for rock strata. In the first part of the activity, students are asked to sequence cards by identifying and ordering overlapping letters found on the cards. SW Science 10 Unit 6 Relative Dating Worksheet  
For each of the relative dating diagrams, you are to think about them like they side view of a layer cake. In general, the oldest units are on the bottom and the youngest units are on the top. There can be lots of complexities, such as folding events, faulting, erosion events, intrusion by magma, etc.
