Wouldn't it feel good to know that a friend is always watching over you? How wonderful would it be to teach your friend about you, while also learning about

yourself? And how amazing would it be if your friend wanted to hear you talk about anything and everything? Well, that friend does exist- and has for years! Who is it, you ask? Why, it's The Rabbit in the Moon! From way up in the sky, on the Moon, the Rabbit watches over all of us down below. With childlike innocence and curiosity, the Rabbit watches, listens, questions, and learns. It longs to be close and near us-as a friend ready to talk and play! So the Rabbit pretends to climb down from the moon, for then it can ask questions to friends below. What does the Rabbit want to know? Everything! The Rabbit speaks about how it sees us act and react to different feelings. In doing so, it also asks questions which cause the reader (or listener) to think about how and why they respond to their own feelings the way they do. And yet, the Rabbit does offer some important lessons it has learned by watching us below. One of these lessons is that, no matter how different we may look on the outside, we all have the same feelings! And isn't that the most important thing to remember? Read along and find out what else the Rabbit has learned . . . and wants to teach us!

Memory. A word so

often said, often

thought of, and

continuously studied.

Yet, we know relatively

so little other than how

vast and magnificent it is. In *Who Will Remember You? A Philosophical History and Theory of Memory and Will*, Israel B. Bitton, offers an interdisciplinary perspective that unifies philosophy of memory with history, neuroscience, culture and ethics, yielding novel insights into the elusive phenomena of memory, namely its universality. Bitton posits that the current

and typical “misunderstanding of memory” stems from over-specialization in scientific research, a compartmentalization that does not support reaching holistic conclusions which are necessary for fully appreciating the totality of memory phenomena. No longer should memory be thought of as residing only in the brain, for the body is known to have memory too, but neither should

it be thought of as exclusively human since it inheres in all matter as a physical and biological fact. Indeed, Bitton extends the philosophical and practical meanings of memory furthest in great detail, employing the latest research in neuroscience to support his case. In this work, Bitton traces the kernels of these ideas from the ancient Egyptians and Israelites all the way through to the modern period in philosophy, science and popular culture, demonstrating that his philosophical formulation has always been and remains accepted de facto by society as can easily be detected in various social trends. Upon offering his holistic account that considers the magnitude of memory phenomena across several disciplines, Bitton presents a novel theory that postulates the primary human drive as categorized by a will to significance, which, because of the universality of memory becomes a will to memorability. By placing the individual at the center of their own memory-reality, they can be empowered to safeguard, enhance, and extend the universal force of memory within and around them. From that vantage point, this book provides its

audience with ideas meant to provoke and incite the readers' own reflections on memory's meaning and import as well as what it takes to be an ethical "memory agent" in an era of hyper-fake news. The Children of the Sun and the Moon Rowman & Littlefield

Read this if you want to sell more books, make more money as an author, or rank higher in your category. My name is Nick Vulich. The first thing you should know about me is I'm not a writer, and I'm

not an expert on self-publishing either. I never worked in the industry, and I don't have any experience working for the big publishers. In fact, the only thing I consider myself an expert in is how to sell on eBay, Amazon, and Fiverr... So why should you listen to me? Like most indie authors, I came into publishing through the back door. I had a story to tell, and one day I just sat down and let it all come out. What I wrote wasn't pretty, or polished...but, it helped a lot of people sell more stuff on eBay. What I couldn't say with fancy prose, I made up for with enthusiasm.

Because of that, my books sold. I'm not going to lie to you. It wasn't easy. I read just about every book available on self-publishing. I studied up on KDP Free days, Countdown Deals, price pulsing... Born Under A Blood Moon Pearson UK
Over the span of 50 years, different tenants come and go. A silent observer sees it all and shares their stories in this six part fiction novel. Fly Me to the Moon Joe Goodden
"You left me. No words. No explanation. You left me. Not the other way around. Disappearing into the sunset with no looking back." Whitley Dawn could not

believe he was the one that had saved her. Could the night get any worse? "You cannot impress me any more with your words. They mean nothing," Whitley looked him dead in the eyes. What was she thinking? She could not believe she just said that to Colt Sampson. Moreover, she didn't even stammer with the words. She blurted them out without thinking about what the outcome would be. What a vixen. He wanted to see those eyes light up like the moon at midnight. Bright with desire. Colt stepped closer to her. He did not think about his next move. He leaned in and whispered, "I promise my words will not only impress you but make your knees weak with desire.

You will beg me to take you, Whitley Dawn." "Never, I don't trust you. I made the mistake once. It won't happen again," Whitley clinched her teeth. Just who did he think he was? She had been fooled when she was younger. She had matured. She had responsibilities with the ranch. Colt smirked. "Don't ever say never. I'm back, Whitley, and there is nothing that you can say or do that is going to change this fact." Catching her off guard, Colt kissed her hard on the lips. "Just a little something to remember me and keep the home fires burning." Hello Sun Moon and Stars

The world today can be best described by one word:

turbulence. As change rages all around, how can you—as an individual or as an organization—take advantage of unexpected opportunities and succeed in difficult circumstances? In a book that challenges traditional notions of strategy, Baba Prasad draws on his research at some of the world's best business schools to show how intelligence can help you and your business navigate this maelstrom. The Intelligences Framework presented in Nimble goes beyond the common management concept of 'agility'—it presents an

immensely practical and hands-on approach for companies and individuals to develop five kinds of intelligences and apply them in different settings for maximum benefit. Bridging strategy, leadership and innovation—and with vivid illustrations—Nimble provides a path-breaking assessment methodology and a systematic four-step approach that every company and individual can use to lead amid turbulence. To celebrate the fortieth anniversary of man's first steps on the moon, a visually striking cornucopia of everything worth knowing about our closest neighbor in space. Can you remember where you were on July 20,

1969, when, in one of the iconic moments of the twentieth century, Neil Armstrong took his first steps on the moon? The distant object that had fascinated mankind for millennia suddenly got much closer. Rick Stroud has been obsessed with the moon since childhood, and here provides the culmination of that passion--an utterly original and absorbing account of all things lunar, a book that celebrates the physics that created the moon and the technology that took us there

as much as its magic and mystery. Opening with the debatable story of how the moon was formed (scientists still don't agree on this), Stroud then turns to the stories of mankind's fascination with Earth's satellite--from Babylonian astronomers thousands of years before Christ, to the Greek, Roman, and Arab scientists who paved the way for the Renaissance, to the astronomers and astronauts of our time. He delves into the mythology and astrology that have inspired

civilizations and cultures the world over, alongside the scientific and medicinal advances that have come from our lunar connection. Filled with original lists, intriguing statistics, and compelling images, "The Book of the Moon "draws us closer to the rocky orb that may hold the secrets of our own Earth's beginnings. The Whole of the Moon Troll River Publications The Whole of the Moon consists of six crisscrossing narratives set along the old Route 66, from the Inland

Empire to the terminus just off Sunset Boulevard. The stories span the years from the late 1950s to the present, and the characters are bound by a fact unknown to them: they have each checked out the same public library copy of *The Great Gatsby*. An actor sits poolside waiting to hear whether he has been cast in a television pilot. Two kids ditch school in 1964 and go for a hike in the woods that turns dangerous. A woman named Dot remembers her husband who spent years working on a musical adaptation of *The Great Gatsby*. A young woman

Felicity deals with the consequences of an unexpected pregnancy. Mike, a former high school star, attends an open tryout for the California Angels baseball team. And a boarding school teacher tells the story of his cousin, a social climber who has disappeared in the wake of a murder. These are the characters that populate *The Whole of the Moon*. Brian Rogers' novel is about determination and failure and life in Southern California away from the red carpet. *Everyone Dreams Under the Same Moon* Hachette Books You will be amazed how this MiNi system works and makes

So begins this remarkable novel by Abigail Carter, whose critically acclaimed The Alchemy of Loss: A Young Widow's Transformation was called "Eloquent and honest" by the Toronto Globe and Mail. Fans of The Lovely Bones and The Alchemist will appreciate Remember The Moon as a beautifully written, inspiring story of everlasting love that reaches far beyond the grave. Clinging to life from the edge of a cliff, Jay, a beleaguered software company executive sees the possibility of

rescue in the eyes of the firefighter dangling nearby, but the car lurches and Jay plunges toward his watery grave. He floats above his lifeless body and hears a familiar voice. "Welcome home J.J." Reunited briefly with his father, who died when Jay, a hapless 14-year-old was unable to save him after a canoe accident, Jay is introduced to his afterlife therapist Alice, who will help ease him into a life of being dead. Death isn't all it's cracked up to be. Jay visits his grieving wife Maya and watches helplessly as his seven-year-old son Calder seems bent on joining his dad through reckless skateboarding accidents. Jay longs to ease their pain and tell them how much he loves them. When

Maya hires Liz, a psychic, Jay's excited to finally give his wife his message of love. Instead, he learns her terrible secret and in anger and jealousy, leads her toward an ill-fated romance with a narcissistic, sexually deviant player she believes is "heaven sent" from Jay himself. Maya's grief becomes more complicated in the aftermath of another loss, and Calder's alarming behavior prompts Jay to find a way to set them both free or risk the well-being of them all. Confronted with the decision to either follow his mortal instincts or help his wife find new love, Jay must learn to transcend everything he ever was.
