The book is written not just for a mechanical engineer but also for the layman who would learn of the mechanical contrivances that contribute to his material welfare. The author has avoided the use of technical terms, as far as possible, and where inescapable, the technical words have been explained and defined. The book covers topics from "Tool Making Animals" to "Engines of Destruction". Through this work, the author has aimed to give a detailed and thorough view of the whole story of human progress in all things mechanical. It's the entire story of machinery, from primitive man's first tries to expand his physical powers with mechanical aids down to that era of early 1900s where massive, steel-muscled machinery and marvelously complex mechanisms, is the story of human advancement.

Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold: "microstamping," the direct imprinting of unique identifiers on firearm parts or ammunition.

In 1999, MCI WorldComm and Sprint agreed to merge. Valued at \$129 billion, this expected transaction was the largest in history. However, it fell victim to regulators in Europe concerned with the potential monopoly power of the merged firm. This M&A action was merely the latest in a growing trend of "blockbuster" mergers over the past several years. Once a phenomenon seen primarily in the United States, mergers and acquisitions are increasingly being pursued across national boundaries. In short, acquisition strategies are among the most important corporate-level strategies in the new millennium. The need for clear, complete, and up-to-date guide to successful mergers and acquisitions had never been greater. This book more than fills that need. Looking at successful--and unsuccessful--mergers and acquisitions in a number of different industries, Mergers and Acquisitions: A Guide to Creating Value explains how to conduct an acquisition and how to avoid pitfalls that have doomed many such ventures. The authors take the reader step-by-step through the process, starting with the elements of a successful merger, due diligence to ensure that the target firm is sound and fits well with the acquiring firm, and how mergers and acquisitions are financed. They move on to explore how firms find partners/targets for acquisitions that have complementary resources and how to find partners with which integration and synergy can be achieved. Finally, they discuss the potential hazards found in M&A's and how to avoid them, how to conduct successful cross-border acquisitions, and how to ensure that ethical principles aren't breached during the process. Based on 15 years of research, this essential guide goes beyond specific case studies to cover all aspects of these ventures, making it required reading for all managers seeking to build a successful strategy. The Psychology of Death Investigations outlines definitively how behavioral evidence can often provide the necessary components and "missing pieces" to complement physical evidence as an essential tool for incident reconstruction. In order to determine the direction of an investigation and to prioritize leads, if necessary, death investigators must establish the manner of a death: natural, accident, homicide or suicide. The most overlooked aspect of death investigation is the psychological dimension, which can provide unique leads, correct false assumptions, enhance investigative awareness, and solve cases in surprising ways. In an estimated 10–20% of cases, the manner of death cannot be determined, or worse, has been erroneously categorized. Since many jurisdictions can't afford behavioral consultants, this book has been written to provide practical information for a basic psychological analysis. If the circumstances surrounding a death are equivocal, psychological consultants can compile information retrospectively about a deceased person's mental state and possible motive to assist with unravelling ambiguity about the manner of death. This is the primary function of a psychological autopsy, and, as such, this is the first book of its kind dedicated solely to the topic. In the event that the manner of death is determined to be a homicide, behavioral profiling can help to focus the potential pool of suspects. Professionals and students alike will benefit from the exercise of cognitive awareness and the application of psychological logic presented. Psychologists, medical examiners, coroners, attorneys, fraud examiners, law enforcement personnel, death and homicide investigators, and students enrolled in criminal profiling, forensic psychology, and criminal justice programs will find this text to be a compelling and insightful reference to add to their professional toolkit.

Filmated in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed.

---

Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.
