It's the 29th February 2020 and Nova Negrahnu cannot wait to start playing Solarversia, a year-

long game based in a virtual world that's modelled on the real world solar system. Given three lives, three vehicles, and told to master the Science of Solarversia to stand a chance of winning, players compete against 100 million people for the 10m grand prize, and a place in the history books. Solarversia starts three months before Nova's A-levels, the life-changing exams that could see her win a place at Nottingham, the university that Charlie attends, the second-year student she falls for on an open-day visit. As she strains to balance her addiction to the game with her mounting schoolwork, Nova's world is unexpectedly turned upside down when the Holy Order, a mysterious cult-like organisation sets its sights on the game and Spiralwerks, its creator. Told from three different perspectives - Nova the gamer, Artica Kronkite, the CEO of Spiralwerks, and Casey Brown, a newly-initiated member of the Holy Order - Solarversia is a game that author Toby Downton hopes to make for real, to launch in 2020, so that people can actually play it. From the initial press release: The world of virtual reality is about to fundamentally reshape the way in which we live, work and play. The Oculus Rift - the much-lauded and potentially transformational VR headset, which broke crowdfunding records in 2012, and was recently acquired by Facebook for \$2 billion - is scheduled to launch in early 2016. While its most obvious impact will hit the world's 700 million plus gamers, Facebook CEO Mark Zuckerberg believes the potential VR impact to be far more profound: "Imagine enjoying a court side seat at a game,

studying in a classroom of students and teachers all over the world or consulting with a doctor face-to-face - just by putting on goggles in your home." The relatively new genre of litRPG, or virtual reality inspired science fiction centred around the gaming industry, is booming, with Ernest Cline's bestseller Ready Player One already in production for a major movie adaptation with Spielberg directing. Downton is emerging as a driving force in the VR revolution. His novel Solaversia is just the first step in his thrillingly ambitious multi-platform story-telling experience that will explore the relationships between artificial intelligence, technology and the human spirit. Downton has incorporated his tech-company - Spiralwerks - in the real world, developing Solarversia as a commercially available game, ready to storm the games market in 2020. Accompanying the publication of Solarversia is the Golden Ticket promotion, which will enable readers to win one of a hundred specially reserved places within the Player's Grid, through a series of innovative competitions."

At the height of her journalism career, more than one million households across the country knew her name and her face. Her reportage on human suffering and triumph captivated viewers, and with it Vanessa Govender shot to fame as one of the first female Indian television news reporters in South Africa. Always chasing the human angle of any news story, Govender

made a name for herself by highlighting stories that included the grief of a mother clutching a packet filled with the fragments of the broken bones of her children after they'd been hacked to death by their own father, and another story where she celebrated the feisty spirit of a little girl who was dying of old age, while holding onto dreams that would never be realised. Yet Govender, a champion for society's downtrodden, was hiding a shocking story of her own. In Beaten But Not Broken, she finally opens up about her deepest secret - one that so nearly ended her career in broadcast journalism before it had barely kicked off. She was a rookie reporter at the SABC in 1999. He was a popular radio disc jockey, the darling of the SABC's Lotus FM, a radio station catering to nearly half a million Indian people across South Africa. They were the perfect pair, or so it seemed. And if anyone suspected the nature of the abusive relationship, Govender says, she doesn't believe they knew the full extent of the horror that the popular DJ was inflicting on this intrepid journalist. The bruising punches, the cracking slaps, and the relentless episodes filled with beatings, kicking and strangling were as ferocious as the emotional and verbal abuse he hurled at her. No one would know the brutal and graphic details of Govender's story ... until now. In Beaten But Not Broken, this Indian

woman does the unthinkable, maybe even the unforgiveable, in breaking the ranks of a close-knit conservative community to speak out about her five-year-long hell in this abusive relationship. Her story also lays bare her heart-breaking experiences as a victim of childhood bullying and being ostracised by some in her community for being a dark-skinned Indian girl. Govender tells a graphic story of extreme abuse, living with the pain, and ultimately of how she was saved by her own relentless fighting spirit to find purpose and love. This is a story of possibilities and hope; it is a story of a true survivor.
