Parentology Arihant Publications India limited

Tras un profundo análisis y estudio de las principales referencias nacionales e internacionales relacionadas con la materia, el manual aporta un enfoque actualizado y centrado en la práctica profesional del proceso de creación en el ámbito de la publicidad. En concreto, se realiza una descripción sistemática del trabajo del creativo publicitario y se reproduce de forma pragmática su metodología. Todo ello combinado con una esmerada base investigadora que aporta consistencia a los contenidos desarrollados. La obra combina la parte teórica con el enfoque empírico-profesional. Está salpicada de ejemplos de publicidad histórica y actual que ilustran los conceptos explicados a lo largo de la misma. Así, el manual se estructura en seis temas organizados en tres partes. La parte primera establece los conceptos básicos de la creatividad como objeto de estudio científico y presenta las principales líneas de investigación incluyendo las aportaciones más destacadas del ámbito de la psicología y de la psicología social. La parte segunda gira en torno a la configuración de la creatividad como actividad profesional, su ubicación en el entorno laboral, las funciones que desempeña el creativo y las relaciones que se establecen con otros profesionales en el desempeño de su trabajo. Por último, la tercera parte desarrolla los conceptos teóricos analizados en la primera, pero aplicados a la actividad publicitaria, desarrollando los componentes de la estrategia creativa en la comunicación publicitaria, así como su aplicación en los medios de comunicación.

Manuals

The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

Moody's Industrial Manual Haynes Manuals

An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a

family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the

book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning > www.frank-thissen.de Key Topics: - Interactive media - Text for the screen - Effective use of pictures - Video, animation, and sound - Screen layout - Orientation and navigation - Interaction - Emotions and metamessages - Intercultural communication
