"A great American tale told with a deft historical eye, painstaking analysis, and a supple clarity of writing."—Jean Baker "My husband considered you a dear friend," Mary Todd Lincoln wrote to Frederick Douglass in the weeks after Lincoln's assassination. The frontier lawyer and the former slave, the cautious politician and the fiery reformer, the President and the most famous black man in America—their lives traced different paths that finally met in the bloody landscape of secession, Civil War, and emancipation. Opponents at first, they gradually became allies, each influenced by and attracted to the other. Their three meetings in the White House signaled a profound shift in the direction of the Civil War, and in the fate of the United States. James Oakes has written a masterful narrative history, bringing two iconic figures to life and shedding new light on the central issues of slavery, race, and equality in Civil War America.

This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years. From a general point of view, coasts are the most quickly changing systems of the Earth. This is critical, since many human resources, such as the main part of economic and social activities, are located in the coastal areas. Especially in the case of Spain these coasts include cities, wide industrial areas (including harbor complexes), important ecologic systems, and our main economic resource: tourism.

Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management, so as to solve problems derived from bad plans developed in the last decades of the twentieth century. This is a valuable text for advanced graduate students and coastal researchers, which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities.

This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of "innovation" and "transition". These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one

looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

Feeling limited by circumstances, substances, or behaviors often leads to the simple, yet profound question, "Is this all there is?" This question is an opportunity to rediscover one's truth and live life more fully and authentically. Spirit Recovery Medicine Bag offers readers a path to finding their personal answer to this question in an engaging two-part format. In Part One, readers will join Lee McCormick as he reflects on his personal journey of recovery and transformation—a journey that initiated him into a life of helping others recover their own sense of self and purpose. Part Two is a medicine bag of healing practices designed to guide readers in developing self-awareness and awakening their sense of power—specifically the power of choice rooted in personal values and commitment to living those values. Covering a variety of topics addressing spirituality, awareness, and consciousness, the authors pose questions for reflection and self-investigation along the way. Spirit Recovery Medicine Bag is not a negation of Twelve-Step recovery, but a tool for expanding awareness and increasing involvement regardless of the path one is walking. In Twelve-Step language, it builds on Step 12's direction to practice these principles in all one's affairs. The authors believe that the inner journey to one's truth and the creative expression of that truth make for a good definition of spirituality, and they offer readers a very real message of the possibility of living "happy, joyous, and free" through spirit recovery.

Illuminating a hidden and fascinating chapter in the history of globalization, Paul Gootenberg chronicles the rise of one of the most spectacular and now illegal Latin American exports: cocaine. Gootenberg traces cocaine's history from its origins as a medical commodity in the nineteenth century to its repression during the early twentieth century and its dramatic reemergence as an illicit good after World War II. Connecting the story of the drug's transformations is a host of people, products, and processes: Sigmund Freud, Coca-Cola, and Pablo Escobar all make appearances, exemplifying the global influences that have shaped the history of cocaine. But Gootenberg decenters the familiar story to uncover the roles played by hitherto obscure but vital Andean actors as well—for example, the Peruvian pharmacist who developed the techniques for refining cocaine on an industrial scale and the creators of the original drug-smuggling networks that decades later would be taken over by Colombian traffickers. Andean Cocaine proves indispensable to understanding one of the most vexing social dilemmas of the late twentieth-century Americas: the American cocaine epidemic of the 1980s and, in its wake, the seemingly endless U.S. drug war in the Andes.
