The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry

Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto

makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. But the very expansion of American firms in Europe still lacked a comprehensive survey. This book gathered two dozens of academics on an actual European level, which paves the way to comparisons, synthetised by leading business

historian M. Wilkins. The breakthroughs achieved here concern the topics of timetable and rhythms of American FDIs in Europe, the patterns followed in each country, along with the specificities of each industry or service sector, and the strategy adopted by big firms. Beyond the facts, the immaterial aspects of this business history are scrutinised, especially about the perception of American firms by Europeans: firms' corporate

image and identity were at stake. The Europeanisation of American firms is a key issue, about industrial relations, management. commercial policies. brand image, connections and embeddedness. The positions of public authorities and of (industrialists and trade unions') lobbies in front of such an American offensive are also gauged. Graphs and tables of figures provide numerous data. And a few

chapters are accompanied by an overview of ads published by American affiliates in newsmagazines. to fuel analysis of their perception by consumers. 1982 DOE Authorization A comprehensive guide to the world of automotive technology, including jargon and anacronyms.
