The purpose of this manual is
to provide clear and helpful
information for maintaining
gravel roads. Very little
technical help is available to
small agencies that are
responsible for managing these
roads. Gravel road maintenance
has traditionally been "more of
an art than a science" and very
few formal standards exist.
This manual contains guidelines
to help answer the questions
that arise concerning gravel
road maintenance such as: What
is enough surface crown? What
is too much? What causes
corrugation? The information is
as nontechnical as possible
without sacrificing clear
guidelines and instructions on
how to do the job right.
