It's the seventh ridiculous day of August, 1971. A drought has besieged Red Clover, South Carolina and the heart of seventeen-year-old Karlene Bridges. Her big sister, Gloria Jean, is pregnant, and everyone carries on as if she were incubating the Light of this World-but Karlene feels hysterical at becoming an aunt at such a young age. Billy Ray Jenkins, former heartthrob, joined the United States Navy six months ago, and Karlene has been incommunicado ever since. To soothe her jangled nerves, she has taken up songwriting-and she is terrible at it-truly terrible. And now, Spencer, her songwriting buddy, might get drafted and end up in Vietnam, sloshing around in rice paddies, which agonizes

Karlene because she knows that peace of any kind is unobtainable on this whirling blue planet. Through the eyes of its sharp-witted, big-hearted protagonist, Luddy weaves an intimate love story about a young woman who dives into the deep end of her own life and attempts to solve the riddle of Life itself with grace and aplomb.

Military Recruiting in the United States provides a fearless and penetrating description of the deceptive practices of the U.S. military as it recruits American youth into the armed forces. Long-time antiwar activist Pat Elder exposes the underworld of American military recruiting in this explosive and consequential book. The book describes how recruiters manage to convince youth to enlist. It details a sophisticated psy-ops campaign directed at children. Elder describes how the military encourages first-person shooter games and places firearms into the hands of thousands using the schools, its JROTC programs, and the Civilian Marksmanship Program to inculcate youth with a reverence for guns. Previously unpublished investigative work reveals how indoor shooting ranges in schools are threatening the health of children and school staff through exposure to lead particulate matter. The book provides a kind of "what's coming next manual" for European peacemakers as they also confront a rising tide of militarism. The book examines the disturbing, nurturing role of the Catholic Church in recruiting youth. It

surveys the wholesale military censorship of Hollywood films, pervasive military testing in the high schools, and an explosion of military programs directed toward youth. For more information, visit: www.counter-recruit.org

Cheryl Garrison wrote *Re-Invent Yourself* after meeting numerous women over 50 who were struggling with the reality of growing older. Career change (including downsizing or layoff), empty nest syndrome, failed retirement, failed business, failed relationships and a lack of confidence in the future are just some of the issues facing women over 50. Cheryl begins the book sharing with the reader her personal journey from a "bold and fearless" 20-year-old to a 50something woman who has been defeated by life-altering changes. *Re-Invent Yourself* is a working guide that chronicles the steps Cheryl took to re-vitalize her life. Why do we stop dreaming after 50something? Why do we think we are too old to start a business or run a marathon? This book answers these questions and then provides resources to help women live out their dreams and aspirations. The book is filled with personal experiences and is divided into 5 chapters, each designed to move the reader closer to creating a Re-Invention Plan which is the objective of the book. Know Yourself - Helps the reader answer the question, "Who are You?" and "What do you Want?." Cheryl believes that at the core of many of the problems women over 50 have is a lack of true identify or an identity that has been lost in the years of giving to others and spending very little time taking care of ourselves. The exercises in this chapter lead women through an assessment of their self-esteem right now and gives techniques for helping them find their true identity. Women completing this chapter will also be able to take a hard look at what they are currently accomplishing in their personal and professional life and begin the process of identifying what they desire to be and do. Heal Yourself- How do we overcome the beliefs that have kept us from succeeding? Cheryl carries the reader through extensive exercises that will help them identify the thoughts that have kept them standing in "cement blocks" and then break through to a life of accomplishment. *Re-Invent Yourself*- Readers are given the tools needed to take the wants they have identified as important to them and create a lifestyle plan for re-invention. The plan includes goal creation, identifying timelines, budgeting, and accountability in order to ensure that goals become a reality. The reader will create long-term, short-term and immediate goals that support their overall plan. Commit Yourself - The final part of Cheryl's re-invention plan is for the reader to be committed to change. Without making the commitment and being open to change, nothing will change. This chapter encourages the reader to get a digital calendar and keep track of daily progress. The next important part of change is getting an accountability partner who will make the journey with the reader. Finally, surrounding oneself with positive affirmations is an important part in creating lasting and sustained change. Cheryl's goal for the reader after they have completed the book is to celebrate a new life just as she has done. She went from near depression to now writing books, creating training programs, coaching and speaking to women over 50 about living a life of passion and purpose.

Excuses, Excuses, Excuses -- Penguin

In this collection, the "early echoes" are the isolating sirens of patrol cars and ambulances in the darkness, along with poems of morning glories in urban alleyways, of seedy coffee shops and neglected stone fountains in vacant back yards. These poems explore the present by reworking it in terms of the past. Sonnets and villanelles alternate with free verse as present and past subsume and modify the

solitary echoes of experience lived and reworded, abbreviated and re-amplified. Experience in these poems is concentric rather than linear, echoes of circles and spheres, of repetitions and refrains. The subject matter is time-self-referential hours and decades, time at once alternating and static, cyclic and monolithic, alienating and echoing, time circular and frozen as stone.

A Non-Invasive, Efficient and Effective Sensory Treatment Strategy for Children and Adolescents that Display Atypical Toe Walking. "Taming Idiopathic Toe Walking: A Treatment Guide for Parents and Therapists" serves as a definitive manual for children and adolescents that display atypical toe walking behaviors. Inspired by the overcoming of toe walking by numerous children during her years of practice, McCaigue's professional expertise and experiences are fused into a vitally powerful resource. TAMING IDIOPATHIC TOE WALKING... is an easy-to-read guide for parents and pediatric, rehabilitation therapists with information on the categories and treatment of atypical toe walking behaviors. This manual explains when toe walking is considered developmentally unusual for a child's age, and idiopathic or done for no known reason. Idiopathic toe walking is often associated with Autism Spectrum Disorders, ADHD, Specific Learning Disabilities, Developmental Delays and other disabilities with sensory processing difficulties, but can occur with typical children, as well. This book serves as a thorough resource for use of an alternative treatment strategy to "calm" the toes, and enable a typical walking pattern in those challenged with this problem behavior. The ultimate goal is the prevention of tendon shortening and resultant limited motions of the ankles and feet from prolonged toe walking that can ultimately lead to the need for injections, bracing or at worst, surgery, to repair the muscular imbalance. TAMING IDIOPATHIC TOE WALKING... provides step-by-step instruction of how to make "Toe Tamers", a unique remediation tool that provides the sensory input that a child or adolescent with idiopathic toe walking needs to overcome this potentially serious problem behavior. A protocol and usage guide is available for: 1) How heavy to make the Toe Tamers, 2) How to apply them, 3) How often they should be worn, and 4) How

long to use them to calm the toes. This would enable relaxation of the feet to stand with full weight bearing on the floor with or without socks and shoes. In addition... a HOME Program sheet is included in English and Spanish to instruct parents on the rationale for applying the Toe Tamers, as well as when and how to effectively use them. Additionally, forms are available for logging the impact of the Toe Tamers. A record and graphs are included to track progress on the length of time, as well as the reduction of heel height, as the Toe Tamers effectively help the toes to lower the entire foot onto a flat surface. As the author explains, her book introduces a sensory treatment strategy for idiopathic toe walking that all should consider exploring. "Children with idiopathic toe walking whose feet are always bouncing on their toes, seem to calm their bodies down after their feet are relaxed. If you think about it, when your feet hurt or figuratively scream at you internally, you cannot relax your body. So, it would make sense that by calming the toes and relaxing the feet, that these children's bodies would relax overall, as well! It is by providing the sensory input needed by these children's feet, that their toes can lower and enable a typical pattern of walking. Using a holistic, sensory strategy in lieu of more traditional interventions will give their feet the input needed to help them overcome this problem behavior," says McCaigue. The book is unique in the marketplace due to the author's own successful use of its methods over a lifetime of experience. "I personally implemented the strategies outlined in this book over the past 27 of my 40 years as an Occupational Therapist working with children. I hope this easy-to-make, therapeutic, sensory strategy will help many children with idiopathic toe walking, and prevent the need for surgery or other more invasive treatment techniques. My goal is to help children with the least restrictive, most effective and efficient way to remediate atypical toe walking," McCaigue explains.
