This White Paper, entitled "Creating growth, cutting carbon: making sustainable local transport happen", sets out the Government's aims in meeting two key objectives: (i) to help create growth in the economy; (ii) tackling climate change by cutting carbon emissions. Action at the local level is seen as delivering gains at the national level. For example, around every three trips made by car are less than 5 miles in length, and it could be argued many such trips could alternatively be cycled, walked or undertaken by public transport. The Government sees the encouragement of sustainable travel choices benefiting the economy, cutting carbon and contributing to road safety and public health. The new Local Sustainable Transport Fund aims to

help local authorities to encourage people to travel sustainably. The publication is divided into nine chapters with one annex, and looks at the following areas: local transport - choices and implications; decentralising power - enabling local delivery; enabling sustainable transport choices; active travel; making transport more attractive; managing traffic to reduce carbon and tackle congestion; local transport in society.
Re-imagining Economic Sociology Wentworth Press
An enthralling historical novel about a young woman's struggle to become a doctor during the Civil War In this stunning first novel, Mary Sutter is a brilliant, headstrong midwife from Albany, New York, who dreams of becoming a surgeon. Determined to overcome the prejudices against women in medicine-and eager to run away from her recent heartbreak- Mary leaves home and travels to Washington, D.C. to help tend the legions of Civil War wounded. Under the guidance of William Stipp and James Blevens-two surgeons who fall unwittingly in love with Mary's courage, will, and stubbornness in the face of suffering-and resisting her mother's pleas to return home to help with the birth of her twin sister's baby, Mary pursues her medical career in the desperately overwhelmed hospitals of the capital. Like Charles Frazier's Cold Mountain and Robert Hicks's The Widow of the South, My Name Is Mary Sutter powerfully evokes the atmosphere of the period. Rich with historical detail (including marvelous depictions of Lincoln, Dorothea Dix, General McClellan, and John Hay among others), and full of the tragedies and challenges of wartime, My Name Is Mary Sutter is an exceptional novel. And in Mary herself, Robin Oliveira has created a truly unforgettable heroine whose unwavering determination and vulnerability will resonate with readers everywhere.

Mathematical Structures in Languages introduces a number of mathematical concepts that are of interest to the working linguist. The areas covered include basic set theory and logic, formal languages and automata, trees, partial orders, lattices, Boolean structure, generalized quantifier theory, and linguistic invariants, the last drawing on Edward L. Keenan and Edward Stabler's Bare Grammar: A Study of Language Invariants, also published by CSLI Publications. Ideal for advanced undergraduate and graduate students of linguistics, this book contains numerous exercises and will be a valuable resource for courses on mathematical topics in linguistics. The product of many years of teaching, Mathematic Structures in Languages is very much a book to be read and learned from.

This chart book is designed to document current differences in well-being by race and Hispanic origin and to describe how such differences have evolved over the past several decades. The charts included in this book show key indicators of well-being in seven broad categories: (1) population; (2) education; (3) labor markets; (4) economic status; (5) health; (6) crime and criminal justice; and (7) housing and neighborhoods. Each section begins with a brief introduction and overview of the charts presented. This information provides a benchmark for measuring future progress and can highlight priority areas for reducing disparities across racial and ethnic groups. All the racial and ethnic groups considered here have experienced substantial improvements in well-being over the second half of the century, but disparities between groups have persisted, or in some cases, widened. An example is the decline in the relative economic status of Hispanics over the past 25 years, reflecting the increasing proportion of Hispanics with lower average levels of education, in large part because of immigration. The section on education, which makes disparities in educational attainment and achievement clear, contains information on family participation in literacy activities and preschool education. One chart reviews computer use by elementary school children, and two charts cover reading and mathematics proficiency scores, both of which have implications for the pursuit of higher education. Three charts focus on the educational attainment of adults over 25 years old. An appendix provides a list of other government publications and Internet addresses for more information. (Contains 49 graphs and bar

charts.) (SLD)
