For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. * * * * * * * * * * * * * * * Excerpt: . . . if your car kept breaking down and the

mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car? Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching

valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

"I cannot imagine living in a world without Walt Disney." Joe Cosgrove Walt Disney's life long journey comes to life as breaking news headlines that entertain and engage dreamers of all ages. This novel storytelling is based on Joe's firsthand experience as well as from friends and mentors who worked closely with Walt during the 1930's through the 1960's. Readers will enter the circle of nearness of Walt Disney's life journey as he transform's and revolutionizes movie cartoons into a powerful new art form. Walt becomes the Founding Father of modern movie animation with the release of his first full length feature film, Snow White. This was the prelude of Walt's bigger dream to create something totally new under the sun. Driven by endless curiosity and courage, Walt Disney's dreams gave birth to the greatest real estate developments and tourist attractions in history with Disneyland and Walt Disney World. Today Walt's impossible dream is still growing. For all those people who helped make his dream come true with the opening of Disneyland in 1955, Walt created a special place called Club 33. Joe Cosgrove was there the day the Club opened in 1967. Club 33 was a secluded hideaway in the Happiest Place on earth for many years until the LA Times wrote a feature titled: "The Most Exclusive Club in the World." Joe reveals some fascinating Club 33 stories during its early secret years. This is also the story of other extraordinary dreamers, visionaries, leaders, innovators and heroes whose lives one day serendipitously intersected with Joe Cosgrove. These ordinary people who did extraordinary things include Joshua Meador, Harrison "Buzz" Price, Bob Hope, Ronald Reagan, Steve Allen, Charles E. Fuller and Billy Graham who are just some of the personalities in this wide reaching story of notable people who help change our world for the better. WALT DREAMERS ME celebrates the American heritage of individual liberty with headline making news of exceptional individuals motivated by the highest possible standards of excellence who created innovations that greatly changed our imagination, our culture and our world for the better. These true life adventure headline stories are filled with heroes, mentors, tricksters, sidekicks, scoundrels and scallywags just like those we read about in the newspaper every day. These very universal caricatures are seen in the classic stories in the Bible. Walt Disney brought these caricatures to life in such

films as Snow White, Pinocchio and Cinderella. It is our intention that our readers accompany each person headlined in order to relate to each of them in a new powerful and personal way.

Have you ever wondered: What it's like to daily bet hundreds of thousands of dollars working for some of the largest professional gamblers in Las Vegas? ... How to spend a summer house sitting one of the biggest stars in the world's 11,000 square-foot mansion - without an invitation from it's celebrity owner ... Whether the life of crime - specifically, running a shoplifting ring in a middle American mall - pays? ... What causes a son to finally say enough is enough ... and decide "Today is the day I am going to kill my dad." Comedian Brandt Tobler has the answers in this funny, touching and sometimes downright unbelievable memoir of a small town Wyoming-kid turned "mall-fia" don, turned nationally touring comic. Brand tells his life story with candor, detailing the many pit stops, wrong turns, crazy connections and lucky breaks he experienced along the way to his comedy career, all while trying to balance a toxic relationship with his unreliable jailbird dad. In these pages Brandt will make you laugh (he better - it's his job!) and believe as he does that, when it comes to defining family, blood isn't always thicker than water. -- back cover.
