The photos in this
edition are black and
white. Mitsubishi's
4G63t engine is among
the most powerful
engines ever in the
sport-compact world.
It's not uncommon to
find one of these
four-cylinder, iron-

block, aluminum-
headed, 2-liter
turbocharged monsters
making more than
1,000 horsepower with
the right
modifications and
tuning - well above
the 200-300 hp
produced in the
factory-made engines.
Bolted into such cars
as the Mitsubishi
Lancer Evolution,
Eclipse, and Galant,
and the Eagle Talon
and Plymouth Laser,
the 4G63t has more
than a cult following

among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the

book includes helpful guidance for choosing your own engine building path.
