of the current SA80 family.

For thousands of years, individual pieces of weaponry have come to symbolize struggles and nations, from the Roman gladius to the English longbow, and from the flintlock musket through to the AK47. This book reveals the weapons that had the greatest impact on our history, explaining how and why they came to prominence, and uncovers the lasting effect they had on the world.

"Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many

times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were

wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill.” This classic includes the following chapters: Introduction I. History of the Sixgun II. Selecting the Handgun III. Learning To Shoot IV. Sixgun Sights V. Long Range Shooting VI. Game Shooting VII. Double Action Shooting VIII. Gun Rigs and Holsters IX. Quick Draw and Hip Shooting X. Gun Fighting XI. Revolver Versus Auto Pistol XII. Aerial and Trick Shooting XIII. Slip Shooting, Fanning, Cavalry Guns XIV. Loading and Management of Cap and Ball Sixguns XV. Repairs, Remodeling, Resighting XVI. A Bullet Chapter XVII.

Gun Crime John Wiley & Sons
This book offers rich critical perspectives on the marketing of a variety of toys, brands, and product categories. Topics

include marketing undertaken by specific children's toy brands such as American Girl, Barbie, Disney, GoldieBlox, Fisher-Price, and LEGO, and marketing trends characterizing broader toy categories such as on-trend grotesque toys; toy firearms; minimalist toys; toyetics; toys meant to offer diverse representation; STEM toys; and unboxing videos. Toy marketing warrants a sustained scholarly critique because of toys' cultural significance and their roles in children's lives, as well as the industry's economic importance. Discourses surrounding toys—including who certain toys are meant for and what various toys and brands can signify about their owners' identities—have implications for our understandings of adults' expectations of children and of broader societal norms into

which children are being socialized.

"In *The Gravest Extreme* tells it like it is, and prepares you to protect you and yours against criminal violence without being crucified for it in court. Anti-gunners call it "a guide on how to kill criminals and get away with it," but men like Lt. Frank McGee, former head of firearms training for New York City Police Department, say it's "must reading" for anyone who keeps a gun for self defense. Welcome to the reality of the street in a book that also makes a memorable gift to anyone who keeps a gun in their home" --Publisher description.

Despite a long history of involvement in the design and production of firearms, the Birmingham firm of Webley & Scott is probably better known to the general public for its manufacture of airguns than for any other product. Until now, there has been no

published reference that concentrates exclusively on the history and development of Webley air pistols. This book has been prepared to offer a comprehensive guide for all those interested in the subject and who appreciate the traditional British craftsmanship entailed. It embraces all models based upon the same initial patent, which were produced between the years 1924 and 1999, commencing with the original 'Mark 1' and progressing through twelve other models to the final 'Webley Tempest' introduced more than half a century later. In addition to the pistols themselves, there are sections of the book relating to pellet styles and various shooting accessories produced by the same company. The whole work is divided into twenty-two sections, the text being accompanied throughout with 226 original photographs and over 70 line illustrations, each of which has been prepared by the author.

Arguably of all the branches of the German armed forces in World War Two, only the Kriegsmarine had the ability to bring Britain to defeat once the immediate threat of invasion after Dunkirk had receded. With the threat posed by its U-Boats and great capital ships, such as the Bismarck and Tirpitz, the Kriegsmarine, through its attacks on the convoys bringing vital supplies across the Atlantic, came close to starving Britain into submission. This addition to a popular series will provide the collector with detailed and objective advice on Kriegsmarine memorabilia with the usual guide to values and how to spot forgeries. For all active collectors of Third Reich militaria and those interested in the Kriegsmarine during the period from 1939

to 1945, this will be essential reading.
