A Handbook for Development Practitioners Cosimo, Inc.
Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design,

construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of

the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force — make this bestselling book a must-have for policing courses.

Democracy and Education John Wiley & Sons

Education is a source of national pride in Lebanon. When the general public was asked how the education system was performing, 76 percent of respondents had a positive opinion; and these satisfaction rates have been consistently high over the years. However, perception of education quality does not reflect the reality of the sector; and learning outcomes, which are the determining metrics of success in education, have been lower than the international average, with a declining trend since 2007. This volume seeks to uncover why the education system in Lebanon is not reaching its full potential. It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes. This includes the study of context, stakeholders, and processes that shape education policies, institutions, and activities. It also aims to identify enablers of and constraints on policy change and implementation, as well as the achievement of results. In this context, the analysis encompasses how education policies are developed; how education consumables—such as curricula, textbooks, and learning materials—are produced, distributed, and used by learners; how education services are delivered and monitored; and how achieved results are measured. It includes the identification of the most influential actors in the education arena, as well as their vested interests. It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation. The system-level analysis presented in this volume used a mixed-method approach. Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1,900 research papers, articles, and books; laws and policies; expenditures; trends; and enrollment and outcome indicators. Primary methods of inquiry were also used and included interviews, focus group discussions, and a household-based perception survey.

John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century.

Facilitating Interdisciplinary Research examines current interdisciplinary research efforts and recommends ways to stimulate and support such research. Advances in science and engineering increasingly require the collaboration of scholars from various fields. This shift is driven by the need to address complex problems that cut across traditional disciplines, and the capacity of new technologies to both transform existing disciplines and generate new ones. At the same time, however, interdisciplinary research can be impeded by policies on hiring, promotion, tenure, proposal review, and resource allocation that favor traditional disciplines. This report identifies steps that researchers, teachers, students, institutions, funding organizations, and disciplinary societies can take to more effectively conduct, facilitate, and evaluate interdisciplinary research programs and projects. Throughout the report key concepts are illustrated with case studies and results of the committee's surveys of individual researchers and university provosts.

The UNDP Crisis Prevention and Recovery Report 2008 titled *Post-Conflict Economic Recovery: Enabling Local Ingenuity*, is a comprehensive analysis focusing on three critical factors: the importance of local ingenuity to guide recovery, the state's role in

promoting this ingenuity, and the policies needed to rebuild battered economies and reduce the risk of conflict recurrence. The study cites examples of countries that have succeeded in rekindling post-conflict economies and those that continue to flounder, discussing the foundations that are so vital to foster post-conflict economic recovery.

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps

one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

Compiler Construction John Wiley & Sons

This book discusses what constitutes vocational education as well as its key purposes, objects, formation and practices. In short, it seeks to outline and elaborate the nature of the project of vocational education. It addresses a significant gap in the available literature by providing a single text that elaborates the scope and diversity of the sector, its key objectives (i.e. vocations and occupations), its formation and development as an education sector, and the scope of its purposes and considerations in the curriculum. The volume achieves these objectives by discussing

and defining the concept of vocational education as being that form of education that seeks to advise individuals about, prepare them for, and further develop their capacities to perform the kinds of occupations that societies require and individuals need to participate in—and through which they often come to define themselves. In particular, it discusses the distinctions between occupations as a largely social fact and vocations as being a socially shaped outcome assented to by individuals. As people identify closely with the kinds of occupations they engage in, the standing of, and the effectiveness of vocational education is central to individuals' well-being, competence and progress. Ultimately, this book argues that the provision of vocational education needs to realise important personal and social goals.

The core purpose of social enterprise is to create value for the betterment of society. This aim lies at the center of the framework and is the end toward which all other elements in the framework must contribute. Greater alignment of these elements with the central purpose produces higher organizational coherence which contributes to superior performance.

Using a cross-country sample of 169 IMF-supported programs and detailed studies of 15 programs, this evaluation report examines various aspects of fiscal adjustment in IMF-supported programs. It presents evidence that does not support some critics' view that IMF-supported programs typically adopt a one-size-fits-all approach to fiscal adjustment, nor the perception that programs always involve austerity by targeting reductions in public spending. The report also proposes a number of recommendations for IMF surveillance and program design in the future.
