When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an

evidence-based argument, cite their sources, and structure their work in a logical way. A Manual for Writers of Research Papers, Theses, and Dissertations—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style, 17th edition, as well as with the latest edition of The Craft of Research. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. A Manual for Writers also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, A Manual for Writers has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.

This book contains twenty-eight papers by participants in the NATO Advanced Study Institute (ASI) on "Cognitive and Linguistic Aspects of Geographic Space," held in Las Navas del Marqués, Spain, July 8-20, 1990. The NATO ASI marked a stage in a two-year research project at the U. S. National Center for Geographic Information and Analysis (NCOIA). In 1987, the U. S. National Science Foundation issued a solicitation for proposals to establish the NCGIA—and one element of that solicitation was a call for research on a "fundamental theory of spatial relations". We felt that such a fundamental theory could be searched for in mathematics (geometry, topology) or in cognitive science, but that a simultaneous search in these two seemingly disparate research areas might produce novel results. Thus, as part of the NCGIA proposal from a consortium consisting of the University of California at Santa Barbara, the State University of New York at Buffalo, and the University of Maine, we proposed that the second major Research Initiative (two year, multidisciplinary research project) of the NCOIA would address these issues, and would be called "Languages of Spatial Relations" The grant to establish the NCOIA was awarded to our consortium late in 1988.

Leonardo Da Vinci, Selected Scholarship: Leonardo's projects, c. 1500-1519 Mona Lisa

The woman in Leonardo da Vinci's work gazes out from the canvas with a quiet serenity. But what lies behind the famous smile? Shrouded in mystery, the Mona Lisa has attracted more speculation and questioning than any other work of art ever created. This work provides an aide memoire of the world's most famous painting. The full-page colour plates portray the Mona Lisa in close-up photographs, while Serge Bramly, the author, explores its shadowy history and the fascination the painting has engendered. The world's greatest cultural icon still has secrets to reveal - not the silly secrets that the 'Leonardo loonies' continue to advance, but previously unknown facts about the lives of Leonardo, his father, Lisa Gherardini, the subject of the portrait, and her husband Francesco del Giocondo. From this factual beginning we see how the painting metamorphosed into a 'universal picture' that became the prime vehicle for Leonardo's prodigious knowledge of the human and natural worlds. Above all, Martin Kemp and Giuseppe Pallanti cut through the suppositions and the myths to show that the portrait is a product of real people in a real place at a real time. This is the book that brings back a sense of reality into the creation of the portrait of Lisa del Giocondo. And the actual Mona Lisa, it turns out, is even more astonishing and transcendent than the Mona Lisa of legend.

Everybody knows her smile, but no one knows her story: Meet the flesh-and-blood woman who became one of the most famous artistic subjects of all time—Mona Lisa. A genius immortalized her. A French king paid a fortune for her. An emperor coveted her. Every year more than nine million visitors trek to view her portrait in the Louvre. Yet while everyone recognizes her smile, hardly anyone knows her story.

“ Combining history, whimsical biography, personal travelogue, and love letter to Italy...Mona Lisa is an entertaining ” (Publishers Weekly) book of discovery about the world ' s most recognized face. Who was she? Why did the most renowned painter of her time choose her as his model? What became of her? And why does her smile enchant us still? Dianne Hales, author of La Bella Lingua, became obsessed with finding the real Mona Lisa on repeated trips to Florence. In Mona Lisa: A Life Discovered, she takes readers with her to meet Lisa ' s descendants; uncover her family ' s long and colorful history; and explore the neighborhoods where she lived as a girl, a wife, and a mother. In the process, we can participate in Lisa ' s daily rituals; understand her personal relationships; and see, hear, smell, and taste “ her ” Florence. Hales brings to life a time poised between the medieval and the modern, a vibrant city bursting into fullest bloom, and a culture that redefined the possibilities of man—and of woman. Mona Lisa is “ a readable and affectionate my-search-for-story for art lovers and anyone interested in glorious and gory Florence in the fifteenth to sixteenth centuries, and in the divine Leonardo in particular...Hales ' s assiduous research has made it possible for us to know Mona Lisa just a bit, enough to wonder if this otherwise ordinary Florentine housewife could ever have imagined her portrait enchanting millions for centuries ” (USATODAY.com).

The topic of attribution and authentication of art works is a well-known one and is currently the subject of heated debate. To arrive at a univocal scientific truth, however, it is necessary to integrate historical-humanistic and technical-experimental skills

with a subjective and objective evaluation. The first part of the volume deals with experimentation relating to three valuable artifacts of different material composition: a painting, a sculpture, a codex. The second part of the research regards the emblematic case of the Mona Lisa and its uniqueness. The question connected to this study is: "Is there a second Mona Lisa?" Is the Isleworth Mona Lisa, also known as the Earlier Mona Lisa, a second version of the Louvre Mona Lisa painted by the Renaissance genius Leonardo da Vinci? In order to provide an answer regarding attribution, a methodological path was applied to the painting on canvas "Mona Lisa with columns" (St. Petersburg), establishing that it was a copy, albeit a well-executed one. Numerous versions and copies of the Mona Lisa were also studied, basing their examination on the in-depth archival-bibliographic research of the many paintings on the same subject. The findings highlighted the distinction between two authentic versions by Leonardo, i.e. the Louvre Mona Lisa and the Isleworth Mona Lisa and two copies, i.e. the Prado and the Reynolds Mona Lisas. The latter two, considered to be the most complete and qualitatively better than many others are, in fact, either copies of previous Mona Lisas or of the two authentic versions. The final considerations are dedicated to the chronological sequence of historical sources, stylistic and aesthetic analyses, artistic techniques and experimental investigations to prove the authentication of the Isleworth Mona Lisa by Leonardo.

A new book by John McLeod is always a treat and, like good qualitative research, takes the reader by surprise, and shows him or her something new. The revelation to me in this book is its focus on philosophy (rather than psychology) and on John's insistence that qualitative research is rooted in a mixture of phenomenology and hermeneutics. Those of us engaged in qualitative research are challenged to underpin our work with a deeper awareness of relevant philosophy with Chapters 2, 3 and 4 offering a good starting point. This book might not be seen then as being for the novice researcher who, in any case, would be best advised to start with one of John's earlier books: *Doing Counselling Research* (SAGE, 1994) or *Practitioner Research in Counselling* (SAGE, 1999). However, many parts of this book are essential reading for those beginning qualitative research. The first half of Chapter 9, for example, 'How to Do Qualitative Research?' is rich material, as is Chapter 6, which explores grounded theory, referred to by John as the 2nd market leader in qualitative research. Chapter 10 takes a critical stance on randomized controlled trials before arguing the case for using qualitative outcomes measures: "Qualitative interviews appear to be, at present, the most sensitive method for the evaluation of the harmful effects of therapy and also for recording its greatest successes. The standardized self-report methods used in randomized trials appear both to inhibit criticism of therapists and reporting of deterioration and also give little scope for clients to describe the hugely positive transformational experiences that can sometimes take place in counselling". This book deeply addresses what it means to do qualitative research into counselling and psychotherapy with plenty for the novice researcher and even more for those already deeply immersed in qualitative research' - William West, *Counselling and Psychotherapy Research*

Qualitative methods are particularly suited to answering the kinds of questions that counsellors and psychotherapists need to ask about their practice. *Qualitative Research in Counselling and Psychotherapy* has therefore been written to help researchers find their way through the range of methodologies and techniques available to them. Leading expert, and bestselling author John McLeod takes the reader through each stage of the research process, explaining techniques for gathering data, writing up the study and evaluating the findings. Each qualitative method is clearly described and critically assessed in terms of its own strengths and weaknesses. Examples from actual research studies are

given to show how the methods work in practice. The need to show how and why counselling works has led to an explosion of research activity. For all those involved in research - whether as part of academic study or in practice this book will be essential reading. As an introduction to qualitative methods, this it is certain to be widely recommended on courses in counselling and counselling psychology and will also be of interest to those who provide counselling in other professional areas such as nursing and social work.

Mona Lisa: Leonardo's Earlier Version Oxford University Press

Traveling on the luxury liner France early in 1963, the Western world's most famous painting sailed across the Atlantic on its maiden voyage to the United States. President John F. Kennedy officially welcomed the Mona Lisa for her stay in the capital and New York. In two months almost two million Americans came to admire the French treasure. The goodwill generated by the loan eased U.S.French relations, which had soured over tensions stemming from the Cold War. The mastermind behind the Mona Lisa's triumphant tour was France's newly appointed minister of cultural affairs, Andr Malraux. In this engaging book, Herman Lebovics recounts how Malraux's brilliant foray into the realm of diplomacy was but one example of his efforts to employ France's cultural heritage in the service of a renewed national grandeur. Malraux's cabinet position was created in 1959 by Charles de Gaulle, who entered his presidency deeply concerned over unraveling social cohesion at home and the nation's weak standing abroad. To help him address these problems, he turned to a paragon of the engag French intellectual. Malraux was an acclaimed novelist, a daring adventurer, a flamboyant anti-colonialist and one-time leftist, a courageous resistance leader, and an inspired commentator on art. In his ten years as a cabinet minister, Malraux sought to "marry" the French people to their historic culture and to restore France to her place as artistic center of the West. Lebovics examines the successes and failures of

Malraux's remarkable career and the reactions of artists, the political class, and the public to the French state's new engagement with the national culture.

Bency Nanay brings the discussion of aesthetics and perception together, to explore how many influential debates in aesthetics look very different, and may be easier to tackle, if we clarify the assumptions they make about perception and about experiences in general. He focuses on the concept of attention and the ways in which the distinction between distributed and focused attention can help us re-evaluate various key concepts and debates in aesthetics. Sometimes our attention is distributed in an unusual way: we are attending to one perceptual object but our attention is distributed across its various properties. But in other aesthetic contexts our attention is not at all distributed but very much focused. The book closes with an analysis of some paradigmatic aesthetic phenomena in which this is the case: identification and engagement with fictional characters. It argues that the conflict and interplay between distributed and focused attention is an important feature of many artworks.

"A dazzling collection of stories based in part on his/her life... Readers will want to consume these bonbons slowly because they are so rich and delicious." - Gay City News "Chilean American writer Ojeda dazzles and devastates in this rich collection about a group of trans Latinx immigrants as they try to make it in New York City." - Publishers Weekly

Drawing from his/her own experience as a trans performer, sex worker, and undocumented immigrant, Iván Monalisa Ojeda chronicles the lives of Latinx queer and trans immigrants in New York City. Whether she is struggling with addiction, clashing with law enforcement, or is being subjected to personal violence, each character chooses her own path of defiance, often responding to her fate with irreverent dark humor. What emerges is the portrait of a group of friends who express unquestioning solidarity and love for each other, and of an unfamiliar, glittering and violent, New York City that will draw readers in and swallow them whole. On every page, Iván Monalisa's unique narrative talent is on display as he/she artfully transforms the language of the streets, making it his/her own -- rich with rhythm and debauchery. This bold new collection positions Ojeda as a fresh and necessary voice within the canon of world literature.
