"Dr. Gao finds the best provisions and practices in respect of the fraud rule in the United States, the United Kingdom, Canada, and Australia, and applies these standards to the reformulation of the fraud rule in the PRC. In the process he surveys the entire field of the fraud rule in the law of letters of credit in its substantive aspects, thus going deeper than mere banking law analyses and revealing, for the benefit of jurists everywhere, the fundamental legal issues that must underlie all sound judicial reasoning in the area. In more practical terms, this approach also allows judges to meet their essential responsibility - that of giving an answer when a case is put before them - with the widest and best possible degree of discernment."--BOOK JACKET.

This collection brings together work from scholars across sociolinguistics, World Englishes and linguistic landscapes to reflect on developments and future directions in Irish English, building on the ground-breaking contributions of Jeffrey Kallen to the discipline. Taking their cue from Kallen's extensive body of work on Irish English, the 20 contributors critically examine advances in the field grounded in frameworks from variationist sociolinguistics and semiotic and border studies in linguistic landscapes. Chapters cover pragmatic, cognitive sociolinguistic, sociophonetic, historical and World Englishes perspectives, as well as two chapters which explore the border between Northern Ireland and the Republic of Ireland through the lens of perceptual dialectology and linguistic landscape research. Taken together, the collection showcases the significant role Kallen has played in the growth of Irish English studies as a field in its own right and the impact of this work on a new wave of researchers in the field today and beyond. This volume will be of particular interest to scholars of varieties of English, variationist sociolinguistics and linguistic landscape research.

*Social Research Methods by Example* shows students how researchers carry out work on the cutting edge of social science. The authors illustrate every point through engaging, thought-provoking examples from real research. The language is jargon-free, making research methods less intimidating and more relatable. The text is divided into three major sections, the first of which introduces students to the principles of research through examples from various fields. The second section walks students through the major types of social science research, with each chapter focusing on a different technique. The third section shows students how to carry out basic quantitative data analysis in SPSS. The final chapter shows how technological advances have changed the way researchers are working, and looks at the direction of social science research in the future. *Social Research Methods by Example* not only introduces students to the principles of social science research, but gives them a toolbox to carry out their own. By the time they are finished with the book, students will be conversant with many of the most important studies in the history of social science. They will understand not only how to conduct research, but also how the field has evolved over time.

*The Literature Review* Corwin Press

In a research project, the most critical part is writing the report in a way which presents not just our findings, but the process through which we arrived at these findings. It demands honesty about our research design and our perspectives, so that others can understand not just the research we have produced, but something about the way in which we have produced it. When carrying out research it is all too easy to become embroiled in our own research questions and objectives, so that when it comes to presenting our research we forget about situating it within the wider body of knowledge. For the lack of proper knowledge, many people find it difficult to writing up their paper. This book is intended to help you organize and write a quality research paper for Social Sciences. This book also gives you the idea about research design.

<https://www.routledge.com/9780367207939> Doing Academic Research is a concise, accessible, and tightly organized overview of the research process in the humanities, social sciences, and business. Conducting effective scholarly research can seem like a frustrating, confusing, and unpleasant experience. Early researchers often have inconsistent knowledge and experience, and can become overwhelmed – reducing their ability to produce high quality work. Rather than a book about research, this is a practical guide to doing research. It guides budding researchers along the process of developing an effective workflow, where to go for help, and how to actually complete the project. The book addresses diversity in abilities, interest, discipline, and ways of knowing by focusing not just on the process of conducting any one method in detail, but also on the ways in which someone might choose a research method and conduct it successfully. Finally, it emphasizes accessibility and approachability through real-world examples, key insights, tips, and tricks from active researchers. This book is a highly useful addition to both content area courses and research methods courses, as well as a practical guide for graduate students and independent scholars interested in publishing their research.
