- What impact does gender difference make to political decision-making? - Will the political empowerment of women contribute to a more peaceful world? The role of gender has been increasingly recognized as central to the study and analysis of the traditionally male domains of war and international relations. This book explores the key role of gender in peace research, conflict resolution and international politics. Rather than simply 'add gender' the aim is to transcend different disciplinary boundaries and conceptual approaches to provide a more integrated basis for future study. To this end it uniquely combines theoretical chapters alongside empirical case studies to demonstrate the importance of a gender perspective to both theory and practice in conflict resolution and peace research. The theoretical chapters explore the gender relationship and engage with the many stereotypical dichotomies like femininity and peace and masculinity and war. The case study chapters (drawing on examples from South America, South Asia and Europe, including former Yugoslavia) move beyond theoretical critique to focus on issues like sexual violence in war, the role of women in military groups and peacekeeping operations and the impact of a 'critical mass' of women in political decision-making. Gender, Peace and Conflict will provide an invaluable survey and new insights to a central area of contemporary research. It will be essential reading for academics, students and practitioners across peace studies, conflict resolution and international politics.

Over the past decade, interest in gender equality and women's empowerment has grown rapidly, creating a unique opportunity to institutionalize gender research within agricultural research for development. This book, edited by researchers from the CGIAR Gender Platform, reviews and reflects on the growing body of evidence from gender research. It marks a shift away from a traditional focus on how gender analysis

can contribute to improved productivity, flipping the question to ask, How does agricultural and environmental research and development contribute to gender equality and women's empowerment? Chapters synthesize the wide range of CGIAR and other research in this area, covering breeding research and seed systems, value chain participation, nutrition-sensitive agriculture, natural resources, climate adaptation and mitigation, the "feminization" of agriculture, women's role in agricultural research, and emerging gender transformative approaches.

This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

From Dr. Amy Blackstone, childfree woman, co-creator of the blog we're {not} having a baby, and nationally recognized expert on the childfree choice, comes a definitive investigation into the history and current growing movement of adults choosing to forgo parenthood: what it means for our society, economy, environment, perceived gender roles, and legacies, and how understanding and supporting all types of families can lead to positive outcomes for parents, non-parents, and children alike. As a childfree woman, Dr. Amy Blackstone is no stranger to a wide range of negative responses when she informs people she doesn't have--nor does she want--kids: confused looks, patronizing quips, thinly veiled pity, even outright scorn and condemnation. But she is not alone in opting out when it comes to children. More people than ever are choosing to forgo parenthood, and openly discussing a choice that's still often perceived as taboo. Yet this choice, and its effects personally and culturally, are still often misunderstood. Amy Blackstone, a professor of sociology, has been studying the childfree choice since 2008, a choice she and her husband had already confidently and happily made. Using her own and others' research as well as her personal experience, Blackstone delves into the childfree movement from its conception to today, exploring gender, race, sexual orientation, politics, environmentalism, and feminism, as she strips away the misconceptions surrounding non-parents and reveals the still radical notion that support of the childfree can lead to better lives and societies for all.

[Gender, Nature, and Nurture](#) Routledge Charlotte Perkins Gilman's 1892 short story, The Yellow Wallpaper is a valuable piece of American feminist literature that reveals attitudes toward the psychological health of women in the nineteenth century.

Diagnosed with "temporary nervous depression - a slight hysterical tendency" by her physician husband, a woman is confined to an upstairs bedroom. Descending into psychosis at the complete lack of stimulation, she starts obsessing over the room's yellow wallpaper: "It is the strangest yellow, that wall-paper! It makes me think of all the yellow things I ever saw - not beautiful ones like buttercups, but old foul, bad yellow things. But there is something else about that paper - the smell! ... The only thing I can think of that it is like is the color of the paper! A yellow smell."

This engaging text presents the latest scientific findings on gender differences, similarities, and variations--in sexuality, cognitive abilities, occupational preferences, personality, and social behaviors. The impact of nature and nurture on gender is examined from the perspectives of genetics, molecular biology, evolutionary theory, neuroanatomy, sociology, and psychology. The result is a balanced, fair-minded synthesis of diverse points of view. Dr. Lippa's text sympathetically summarizes each side of the nature-nurture debate, and in a witty imagined conversation between a personified "nature" and "nurture," he identifies weaknesses in the arguments offered by both sides. His review defines gender, summarizes research on gender differences, examines the nature of masculinity and femininity, describes theories of gender, and presents a "cascade model," which argues that nature and nurture weave together to form the complex tapestry known as gender. *Gender, Nature, and Nurture*, Second Edition features: \*new research on sex differences in personality, moral thought, coping styles, sexual and antisocial behavior, and psychological adjustment; \*the results of a new meta-analysis of sex differences in real-life measures of aggression; \*new sections on non-hormonal direct genetic effects on sexual differentiation; hormones and maternal behavior; and on gender, work, and pay; and \*expanded accounts of sex differences in children's play and activity levels; social learning theories of gender, and social constructionist views of gender. This lively "primer" is an ideal book for courses on gender studies, the psychology of women, or of men, and gender roles. Its wealth of updated information will stimulate the professional reader, and its accessible style will captivate the student and general reader. Sex differences in health throughout the lifespan have been documented. Exploring the Biological Contributions to

Human Health begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). Exploring the Biological Contributions to Human Health discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. Exploring the Biological Contributions to Human Health will be important to health policy makers, basic, applied, and clinical researchers, educators, providers, and journalists--while being very accessible to interested lay readers.

Men's gender role conflict is a psychological state in which restrictive definitions of masculinity limit men's well-being and human potential. Gender role conflict (GRC) doesn't just harm boys and men, but also girls and women, transgendered people, and society at large. Extensive research relates men's GRC to myriad behavioral problems, including sexism, violence, homophobia, depression, substance abuse, and relationship issues. This book represents a call to action for researchers and practitioners, graduate students, and other mental healthcare professionals to confront men's GRC and reduce its harmful influence on individuals and society. James O'Neil is a pioneer in men's psychology who conceptualized GRC and created the Gender Role Conflict Scale. In this book, he combines numerous studies from renowned scholars in men's psychology with more than 30 years of his own clinical and research experience to promote activism and challenge the status quo. He describes multiple effects of men's GRC, including success, power, and competition issues restricted emotionality restricted

affectionate behavior between men conflicts between men's work and family relations. O'Neil also explains when GRC can develop in a man's gender role journey, how to address it through preventative programs and therapy for boys and men, and what initiatives researchers and clinicians can pursue. *The Yellow Wallpaper* John Wiley & Sons Gender stereotypes are general beliefs about sex-linked traits and roles, psychological characteristics, and behaviors, all of which contribute towards describing women and men. Gender role stereotyping in advertising has been a critical topic since the 1970s, and there is a long-lasting debate between advertisers and sociologists about the role and the social nature of advertising. Although changing role structures in the family and the labor force have brought significant variation in both male and female roles, it has been noted that there is a cultural lag in advertising, where men and women were, for a long period of time, depicted in more traditional roles. This book extends the research on gender stereotypes in advertising over the past 20 years, highlighting key themes such as attitude towards sex and nudity in advertising; women in decorative roles; the changing roles of women and men in advertising; and the viewpoints of those advertising professionals who design campaigns. This book was originally published as a special issue of the *International Journal of Advertising*. The Craft of Scientific Presentations Cambridge University Press In an advanced industrial society like the contemporary U.S., where an array of legal, political, institutional, and economic processes work against gender inequality, how does this inequality persist? Are there general social processes through which gender as a principle of social inequality manages to rewrite itself into new forms of social and economic organization? Framed by Gender claims there are, highlighting a powerful contemporary persistence in people's everyday use of gender as a primary cultural tool for organizing social relations with others. Cecilia Ridgeway asserts that widely shared cultural beliefs about gender act as a "common knowledge" frame that people use to make sense of one another in order to coordinate their interaction. The use of gender as an initial framing device spreads gendered meanings, including assumptions about inequality embedded in those meanings, beyond contexts associated with sex and reproduction to all spheres of social life that are carried out through social relationships. These common knowledge cultural beliefs about gender change more slowly than do material arrangements between men and women, even though these beliefs do respond eventually. As a result of this cultural lag, at sites of innovation

where people develop new forms of economic activity or new types of social organization, they confront their new, uncertain circumstances with gender beliefs that are more traditional than those circumstances. They implicitly draw on the too convenient cultural frame of gender to help organize their new ways of doing things. As they do so, they reinscribe trailing cultural assumptions about gender difference and gender inequality into the new activities, procedures, and forms of organization that they create, in effect, reinventing gender inequality for a new era. Ridgeway argues that this persistence dynamic does not make equality unattainable but does mean that progress is likely to be uneven and depend on the continued, concerted efforts of people. Thus, a powerful and original take on the troubling endurance of gender inequality, *Framed by Gender* makes clear that the path toward equality will not be a long, steady march, but a constant and uneven struggle.

*Cinema and Society, 1930-1960* Rowman & Littlefield

In this unprecedented survey of British cinema from the 1930s to the New Wave of the 1960s, Marcia Landy explores how cinematic representation and social history converge. Landy focuses on the genre film, a product of British mass culture often dismissed by critics as "unrealistic," showing that in England such cinema subtly dramatized unresolved cultural conflicts and was, in fact, more popular than critics have claimed. Her discussion covers hundreds of works—including historical films, films of empire, war films, melodrama, comedy, science-fiction, horror, and social problem films—and reveals their relation to changing attitudes toward class, race, national identity, sexuality, and gender. Landy begins by describing the status and value of genre theory, then provides a history of British film production that illuminates the politics and personalities connected with the major studios. In vivid accounts of the films within each genre, she analyzes styles, codes, and conventions to show how the films negotiate history, fantasy, and lived experience. Throughout Landy creates a dynamic sense of genre and of how the genres shape, not merely reflect, cultural conflicts. Originally published in 1991. Thorne, a professor of sociology at the University of Southern California, offers her insightful observations of elementary school students in class and at play. Though, as she admits, her status as an adult and an observer may have affected what happened around her, Thorne presents a fascinating account of how children divide themselves—and how others divide them—along gender lines. Breaking students into teams for contests and the eternal game of "cooties" (a contamination attributed more often to girls than boys) reveal much about the microcosm that these students inhabit, and an extensive look at the tomboy, both in literature and in life, compares her ambiguity (sometimes an insult, sometimes a compliment) to the negative attitudes often elicited by gender-crossing in the other direction. Thorne argues convincingly against the theories of scholars like Deborah Tannen and Carol Gilligan that boys and girls have different "cultures," and she attempts to discourage "gender antagonism." A final section offers concrete steps for teachers to take in forming the attitudes—about gender and other topics—of coming generations.

*Gender, Peace and Conflict* Vintage

This book presents an original and groundbreaking approach to gender inequality. Looking at women's power in the home, in the workplace, and in politics from a political economy perspective, the authors demonstrate that equality is tied to demand for women's labor outside the home, which is a function of structural, political, and institutional conditions.--[book jacket].

"Satisfying food for thought on the ever-changing dynamics of men and women as they interact and go about their individual lives" (Kirkus Reviews) as cultural commentator Stephen Marche examines contemporary male-female relations—with the help of his wife, writer and editor Sarah Fulford. One morning in New York City, Stephen Marche, then a new father and tenure-track professor, got the call: his wife had been offered her dream job...in Canada. Their decision to prioritize her career over his and move to Toronto sheds new light on the gender roles in their marriage (and in the world around them). As Marche provocatively argues, we are no longer engaged in a war of the sexes, but rather stuck together in a labyrinth of contradictions. And that these contradictions are keeping women from power and confounding male identity. *The Unmade Bed* is a deeply researched, deeply personal exploration into the moments in everyday life where women and men meet. After all, within offices and homes, on the street, online, and in bed, we constantly ask ourselves: What are we expected to sacrifice? Is it possible to be equal? As he attempts to answer these questions, Marche explores the issues that define our modern conversations on gender,

from mansplaining and sexual morality to parenthood and divisions of the domestic sphere. In the process, he discovers that true power remains shockingly elusive for women while the idea of masculinity struggles in a state of uncertainty. The only way out of these mutual struggles is together. With footnote commentary throughout the book from Marche's wife, *The Unmade Bed* is a "compelling" (The Globe and Mail, Toronto), uniquely balanced, and honest approach to the revolution going on in our everyday lives—a thought-provoking work of social science that is sure to be a conversation starter.
