WBI Learning Resources Series. Water is a vital element for agricultural production and for economic development in general. However, the spatial and temporal distribution of water in Mexico restrains its use. Because of this distribution, it has been necessary to build a large infrastructure to capture, store, and allot this element among water users. Around the world,

countries that once promoted more government involvement in irrigation management are adopting new policies that do just the opposite, creating incentives for farmers to take over the management of operations and maintenance, while government agencies focus on improving the management of water at the main system level. Is this just another management fad; or will the pendulum that is now swinging toward greater management control by farmers soon swing back the other way, toward greater state control? This volume reports on four countries where the state's role in irrigation management has undergone fundamental change and where the result has been a much greater management role for farmers. These studies address the political antecedents of participatory irrigation management (PIM) policies, the process of implementing the policies, and the second-generation challenges of sustaining PIM. These experiences will prove useful to policymakers and irrigation professionals who are facing similar

challenges in their own countries.

Bank Recovery and Resolution Second Edition

Sven Schelo Since 2008, enormous efforts have been made worldwide to draft rules to prevent a reoccurrence of the devastating financial events of that year. In the process, bank business has been laid open to intense public and government scrutiny, and regulation of banking has grown to spectacular proportions. Prominent among the measures taken is the EU Bank Recovery and Resolution Directive (BRRD), which, together with the Single Resolution Mechanism (SRM) and the Single Resolution Fund, constitutes a crucial new pillar in the European Banking Union. Practitioners searching for orientation in what can readily be perceived as a ‘jungle’ have an urgent need for a

clear and systematic description and analysis of these new rules, which are sure to have a massive impact on bank business from this time on, not only in Europe but also wherever European business is to be found. The solidly grounded analysis in this important book sets the new rules under BRRD into their full context as cross-border phenomena. With its crystal-clear explanation of key provisions, procedures, and ‘triggers’, the book organises a highly complex legal system into patterns and action plans that can be applied in virtually any eventuality likely to arise in cases where bank business is of central significance. Among the topics covered are the following: – entities covered by BRRD; – exceptions under BRRD; – objective and scope of BRRD tools – bail-in, bridge bank, sale of business, asset separation; – asset quality reviews; – curing or mitigating the continuing problem of non-performing loans; – new rules as response to lack of private solutions; – banks’ requirement to provide a minimum amount of eligible liabilities; – safety buffers to protect resolution; – need to be ‘resolvable’ in a worst case; – leverage and liquidity ratios; – forced mergers; – market spillover effects of recovery planning; – group recovery planning; – effects of foreign law contracts and assets; – write-down of capital instruments; and – special problems of cross-border restructuring. The presentation is enhanced by a comparative dimension, which includes reference to United States and other national developments and a full-scale analysis of Switzerland’s regulatory response to the crisis. Given that a full seamless global system of bank recovery and resolution has not yet been found, and that major banks are global players headquartered in different jurisdictions and even different continents, this book will greatly assist in the work of practitioners who must deal with cases involving international banking under the prevailing status quo. Its usefulness to officials and academics in international banking and finance law and policy,

who are working towards a global solution, is of incalculable value.

In concierge medicine, physicians develop amenities-rich membership programs and collect a monthly or annual membership fee to pay for the amenities in addition to the medical services rendered. *Handbook of Concierge Medical Practice Design* examines the many considerations physicians must make prior to transitioning their practices into concierge services. Maria K. Todd, a recognized expert in concierge medicine, branding, consulting, healthcare, marketing, medical tourism, planning, and physician practice administration, explains how to set up a concierge practice. She describes how this new business model affects workflow and outlines financial considerations—including managed care payer relations, the hybrid practice, and predictive modeling—to uncover the hidden factors that affect

bottom-line performance. The book supplies readers with models for creating a business plan and a strategy for transforming a practice into a concierge practice. It concludes by covering the legal aspects of creating a concierge practice. It includes patient acquisition and retention strategies as well as detailed plans for adding additional doctors and physician extenders, such as nurse practitioners and physician assistants. The book provides sample employment contracts and advice on how to select and work with consultants. It includes chapters on business process re-engineering, workflow management, financial considerations, competitive analysis, developing a business plan, and how to market the new practice.

Business Law, a Working Manual of Every-day Law International Monetary Fund

Important improvements have been made to the bank resolution, safety net and crisis management framework since the last FSAP. The resolution framework has been strengthened with the creation,

within the Banco Central do Brasil (BCB), of a new Resolution Department, and requirements for recovery and resolution planning have been established. The early intervention powers of the BCB are robust and flexible. Notwithstanding this progress, the current framework has limitations that are broadly acknowledged by the authorities. Resolution powers are incomplete and no formal inter-agency arrangements for crisis management are in place. The BCB has taken the lead in preparing a comprehensive draft law (the “Draft Law”) that seeks to introduce a new resolution regime in line with international best practices. This FSAP takes place therefore at a critical juncture. It provides recommendations on the design features of the new resolution regime, examining the existing framework as well as the areas not addressed in the Draft Law.
