"The U.S. civil court system consists of three levels: 1) District Courts ("Trial Courts"), 2) Circuit Courts of Appeal ("appellate courts") and 3) the Supreme Court (see Figure 1.1). The United States has a total of 94 districts, representing distinct geographic regions (see Table 1.1). The number of districts

varies by state. For instance, some states have only one district (e.g., Arizona, Colorado, Delaware), while others have multiple districts, such as California, Florida, and Michigan (e.g., Southern District of California, Central District of California)"-- Rework Oxford University Press

ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we ’ re offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we ’ ve gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date

with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

A captivating exploration of beach resort culture—from its roots in fashionable society to its undervalued role in today's world economy—as the travel industry approaches a climate reckoning. With its promise of escape from the strains of everyday life, the beach has a hold on the popular imagination as the ultimate paradise. In *The Last Resort*, Sarah Stodola dives into the psyche of the beachgoer and gets to the

heart of what drives humans to seek out the sand. At the same time, she grapples with the darker realities of resort culture: strangleholds on local economies, reckless construction, erosion of beaches, weighty carbon footprints, and the inevitable overdevelopment and decline that comes with a soaring demand for popular shorelines. *The Last Resort* weaves Stodola's firsthand travel notes with her exacting journalism in an enthralling report on the past, present, and future of coastal travel. She takes us from Monte Carlo, where the pursuit of pleasure first became part of the beach resort experience, to a village in Fiji that was changed irrevocably by the opening of a single resort; from the overdevelopment that stripped Acapulco of its reputation for exclusivity to Miami Beach, where

extreme measures are underway to prevent the barrier island from vanishing into the ocean. In the twenty-first century, beach travel has become central to our globalized world—its culture, economy, and interconnectedness. But with sea levels likely to rise at least 1.5 to 3 feet by the end of this century, beaches will become increasingly difficult to preserve, and many will disappear altogether. What will our last resort be when water begins to fill the lobbies?

We have all worked for, or are working at Bully, Inc. An unforgiving workplace environment where the tyranny of the few is allowed to pollute the work experience of the many. It costs. From the estimated £ 20 billion lost to the economy alone each year in the UK to the day in day out rat-on-a-wheel

drudgery and fear. In this game-changing book, author Peter Burnett dissects the phenomenon of Workplace Bullying which impacts one in three of the workforce. He offers a road map out of this infectious 21st Century workplace malaise. A malaise that stretches from the smallest offices to the Houses of Parliament itself charged with legislating on behaviour in the workplace to the boardrooms of the very biggest global players. BULLY, INC. shows how as a society we are now using technology to bully and how media itself can be charged as guilty in its preoccupation with celebrities visible in their own workplaces. BULLY, INC. answers your fundamental questions about workplace bullying: * What is and what is not bullying at work? * Why am I the target? * Why and how do bullies get away with it? * What role do bystanders play? BULLY INC. is the definitive guide to neutralising and eliminating the bully in your workgroup. If you 're working at BULLY, INC. right now this book will help you. BULLYING

affects one in three of the work force. Right now you are probably sharing an office with at least one person whose work life is being terrorised and dreads the everyday work experience. The economic cost of this is put at £ 20 billion per annum. Why? Because an unhappy, dysfunctional workplace is an inefficient one. BULLY, INC. reveals: * The range of health ailments associated with bullying at work impacting both mental and physical health; * The strategies for coping with bullying and ultimately routes to eliminating it altogether; * The identity of a major UK employer with a global footprint as a template for how to structure work relationships and how by offering a receptive and connected working environment bullying is virtually eliminated; * How new thinking about bullying controversially frames the bully as much as a target, as the bullied; * How one generation in particular has got it right in terms of their tolerances of bullying behaviours and how they are on course to neuter the issue for society

generally; * How bullying permeates showbiz in the phenomenon of ' Bullytainment ' - where some celebs find themselves subject to online trolling which in extreme cases has caused some to consider taking their own lives.

A Kiss from Heaven
was inspired by a true story and written to help children grieve the loss of a loved one. One day Rashana learned that a former classmate had tragically lost his wife in a car accident, leaving him with two young daughters. A few days later one of his girls was seen looking out the window at the graveyard nestled in beside the little church across the street from where

they lived. It was Rashana's compassion for those girls that brought A Kiss from Heaven to life.

The Sustainable Slopes program (SSP), created in 2000 and amended to its current version in 2005, forged a framework for implementing sustainability in ski resort operations (NSAA, 2000). While the document is a positive step toward

environmental awareness in ski resort management, it lacks accountability, and only provides guiding principles for resorts in achieving these goals. The SSP is a voluntary program with no legal binding or third party oversight, yet participating resorts can claim to be environmental stewards simply by joining the program. Understanding environmental solutions that ski areas are actually implementing is the foundation for future evaluation of "green" initiatives. By examining environmental programs at current participating resorts through the principles of Sustainable Slopes Program, their sustainability efforts become clearer and

build a foundation for others to strive for. This project used a proprietary Ski Resort Sustainability Survey (Survey) to compare current environmental initiatives at major ski resorts in the United States that have partnered with the National Ski Area Associations (NSAA) Sustainable Slopes Charter. I examined sustainability programs at resorts through all principles highlighted in the Sustainable Slopes Program. The resorts were evaluated based on their survey results, focal resort analysis, and literature review. Based on the survey, resorts averaged a score of 30.5 out of 38 total sustainability points. The top three resorts surveyed were Stowe

Mountain Resort - VT (36), Aspen Skiing Company - CO (35), and Squaw Valley - CA (34.6). The two lowest ranking resorts surveyed were Okemo - VT (22.6), and Bolton Valley - VT (20.6). The survey highlighted examples of excellence in achieving sustainability, as in the case of Aspen and Stowe. Additionally, the survey found underlying discrepancies in the program, with Bolton Valley scoring the lowest score while also being the recipient of the NSAA Silver Eagle Award.
