Sessional Papers Temple University Press Seminar paper from the year 2003 in the subject English Language and Literature Studies - Linguistics, grade: 1,3 (A), University of Hamburg (IAA), 12 entries in the bibliography, language: English, abstract: One major assumption in the study of emotions is the idea that our understanding of emotion metaphors is, to a large extent, based on bodily experience. Although most evidence for this claim has been found in analyses of the English language, Chinese emotions seem to be conceptualised to a large degree in the same way as in English. Previous studies on the concepts of ANGER and HAPPINESS come to the conclusion that English and Chinese only vary in minor aspects, due to cultural differences. But how about the more peripheral type of emotions? Do these show the same metaphorical preferences? Or are they even more culture-specific? In this paper I will show the different metaphorical realization of RESPECT in English and Chinese and offer some suggestions as to why these differences occur. For this analysis I have considered a set of about 140 sentences and idioms in English and Chinese. After considering these sample sentences, it will become evident that these two languages most likely follow the same major metaphorical principles. English and Chinese share important concepts such as GOOD IS UP or THE OBJECT OF RESPECT IS A VALUABLE COMMODITY. And this shows in the metaphorized expressions of respect. It seems, though, that Chinese is far more restricted in the use and meaning of these respect metaphors.

A Case Study of Respect: Contrastive Aspects in English and Chinese Simon and Schuster This volume is the first in a new series of Studies on the Frontiers of International Law. The term 'frontier' is traditionally associated with proximity to a boundary or a demarcation line. But it is also a connecting point, i.e., a passage or channel between spaces that are usually considered as separate entities. The Series aims to explore the visible and imaginary boundaries of scholarship in International Law. It is designed to test the existing table of contents, vocabulary and limits of 'Public International Law', to investigate lines and linkages between 'centre' and 'periphery', and to re-map or re-think some of its conceptual boundaries. The current volume is written in this spirit. It deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in

'Public International Law'.

The theory of semigroups is a relatively young branch of mathematics, with most of the major results having appeared after the Second World War. This book describes the evolution of (algebraic) semigroup theory from its earliest origins to the establishment of a full-fledged theory. Semigroup theory might be termed 'Cold War mathematics' because of the time during which it developed. There were thriving schools on both sides of the Iron Curtain, although the two sides were not always able to communicate with each other, or even gain access to the other's publications. A major theme of this book is the comparison of the approaches to the subject of mathematicians in East and West, and the study of the extent to which contact between the two sides was possible.

Too Young for Respect?

The “dazzling” and essential portrayal of 1960s America from the author of *South and West* and *The Year of Magical Thinking* (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature’s most distinctive prose stylists is a modern classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award – winning author Joan Didion reports on a society gripped by a deep generational divide, from the “misplaced children” dropping acid in San Francisco’s Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, “a personality before she was entirely a person,” and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, “the most extreme and allegorical of American settlements.” First published in 1968, *Slouching Towards Bethlehem* has been heralded by the New York Times Book Review as “a rare display of some of the best prose written today in this country” and named to Time magazine’s list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later.

In 1973, Henry Kissinger shared the Nobel Peace Prize for the secret negotiations that led to the Agreement on Ending the War and Restoring Peace in Vietnam. Nixon famously declared the 1973 agreement to be “peace with honor”; America was disengaging, yet South Vietnam still stood to fight its own war. Kissinger promptly moved to seal up his personal records of the negotiations, arguing that they are private, not government, records, and that he will only allow them to be unsealed after his death. *No Peace, No Honor* deploys extraordinary documentary bombshells, including a complete North Vietnamese account of the secret talks, to blow the lid off the true story of the peace process. Neither Nixon and Kissinger’s critics, nor their defenders, have guessed at the full truth: the entire peace negotiation was a sham. Nixon did not plan to exit Vietnam, but he knew that in order to continue bombing without a congressional cutoff, he would need a fig leaf. Kissinger negotiated a deal that he and Nixon expected the North to violate. Ironically, their long-maintained spin on what happened next is partially true: only Watergate stopped America from sending the bombers back in. This revelatory book has many other surprises. Berman produces new evidence that finally proves a long-suspected connection between candidate Nixon in 1968 and the South Vietnamese government. He tells the full story of Operation Duck Hook, a large-scale offensive planned by Nixon as early as 1969 that would have widened the war even to the point of

bombing civilian food supplies. He reveals transcripts of candidate George McGovern’s attempts to negotiate his own October surprise for 1972, and a seriocomic plan by the CIA to overthrow South Vietnam’s President Thieu even as late as 1975. Throughout, with page-turning dialogue provided by official transcriptions and notes, Berman reveals the step-by-step betrayal of South Vietnam that started with a short-circuited negotiations loop, and ended with double-talk, false promises, and outright abandonment. Berman draws on hundreds of declassified documents, including the notes of Kissinger’s aides, phone taps of the Nixon campaign in 1968, and McGovern’s own transcripts of his negotiations with North Vietnam. He has been able to double- and triple-check North Vietnamese accounts against American notes of meetings, as well as previously released bits of the record. He has interviewed many key players, including high-level South Vietnamese officials. This definitive account forever and completely rewrites the final chapter of the Vietnam war. Henry Kissinger’s Nobel Prize was won at the cost of America’s honor.

George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the Orwell’s Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the ‘four great motives for writing’ – ‘sheer egoism’, ‘aesthetic enthusiasm’, ‘historical impulse’ and ‘political purpose’ – and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell’s mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer’s oeuvre. ‘A writer who can – and must – be rediscovered with every age.’ — Irish Times
