Respiratory diseases affect a large proportion of the population and can cause complications when associated with pregnancy. Pregnancy induces profound anatomical and functional physiological changes in the mother, and subjects the mother to pregnancy-specific respiratory conditions. Reviewing respiratory conditions both specific and non-specific to pregnancy, the book also addresses related issues such as smoking and mechanical ventilation. Basic concepts for the obstetrician are covered, including patient history, physiology and initial examinations. Topics such as physiological changes during pregnancy and placental gas exchange are discussed for the non-obstetrician. Guidance is practical, covering antenatal and post-partum care, as well as management in the delivery suite. An essential guide to respiratory diseases in pregnancy, this book is indispensable to both obstetricians and non-obstetric physicians managing pregnant patients.

This new innovative resource aims to give physiotherapy students and those new to respiratory care a simple, easy-to-use guide to the process and procedures used in the assessment of adult respiratory patients. Cardiorespiratory Assessment of the Adult Patient begins by identifying the scope of respiratory physiotherapy and listing some key aims of assessment with an overview of different approaches. It then goes on to provide a selection of 'assessment checklists' for the main clinical

settings which the physiotherapist is likely to encounter. Chapter 3 provides a selection of 'assessment tools' given alphabetically, including those that physiotherapists may be expected to carry out themselves and those where they only need to interpret the assessment findings. These tools include a systematic guide to the procedure involved (where relevant) and an explanation of the key findings and their significance for the physiotherapist. In the final section, individuals can apply their knowledge using case scenarios and suggested solutions are also provided. Part of the Physiotherapist's Toolbox Series – unlock your key skills! Perfect for use on placement and in the clinic. Assessment checklists for main clinical settings – ideal for aide memoires
